Mirror-HR User Guide

How every part of the ERP works: where to go, what to click, why it is there.

39 modules · 258 functions

Date: 2026-11-14

Contents

1. Getting started
- Sign in and sign out
- Set up a new company: step by step
- The top bar: language, guide, bell, your name
- The left menu (modules)
- Who can see and do what (roles)

2. Dashboard
- Company today and Team today
- My Performance
- My Target
- Today and requests
- Salary Earned
- HR Assistant (policy chat)

3. Inbox
- Game view (home map)
- My tasks
- Sent by me
- All approvals
- Scheduler

4. Employees
- Employee list
- Add or edit an employee
- Bulk change of manager

5. Workforce
- Organization structure
- Attrition and retention
- Joining to retention
- Uniform and ID card
- Onboarding and KYC

6. Recruitment
- Overview
- Manpower plan
- Requisitions
- Vacancies
- Candidates
- Interviews
- Offers
- Recruiters
- Reports

7. Time Office
- Shift assignment
- Attendance check
- Punch exceptions

Attendance processing
Overtime and extra pay

8. Payroll

Monthly payroll
Salary advance
Salary earned
Incentives
Payments
Final settlement
Payslips
Bank details
Tax declarations
Statutory rules
Wage rules
Statutory assignment
Salary structure
Employee salary
My payslip
My tax

9. Core Setting

Chat Logs

1. Getting started

The basics that every person using Mirror-HR should know.

Sign in and sign out

Where: Login page

What it is: The first screen. You enter your company code, your employee number (for example E004) and your password.

Why it is there: So that every person sees only what belongs to them and to their role.

Who uses it: Everyone.

Step by step:

1. Open the Mirror-HR link in your browser.
2. Type the company code, your employee number and your password, then press Sign in.
3. If you forgot the password, press Forgot password and follow the steps.
4. To sign out, press the arrow icon at the top right, next to your name.

Good to know:

- Your changes are saved to the database a moment after you make them. Signing out first saves anything still waiting, and the browser warns you if you close the page before it is saved. Signing out on one device does not close the same login on your other devices. If the strip on top of the page shows a ⚠ sign with a message, or a message says Not saved to the database, the change was NOT saved: note the message and tell Mirror-HR. If a part of the first screen cannot be drawn, you stay signed in and the top strip says so; your changes are still saved.
- After too many wrong passwords the account is locked for a short time. HR can unlock it.

Set up a new company: step by step

Where: Setup guide (left menu) and the card on the Dashboard

What it is: The order in which a new company sets up Mirror-HR, and why that order: each step depends on the ones before it. The Setup guide page and the card on the Dashboard show the same steps with a tick for each one that is done. A tick comes from your real data (for example the employees you added); the steps that cannot be read from data you mark yourself with Mark as done, after you have looked at them. A step is locked while something it needs is not done.

Why it is there: So that nothing is set up too early or too late. For example, salary needs the designations, and an employee cannot be added without the organization chain.

Who uses it: Admin and HR. Anyone who is given the right Setup guide in Core Setting > Rights.

Step by step:

1. 1. Company basics. Core Setting > General: name, address, state, notice period. Core Setting > Code series: the format of the employee code. Set the format before you add employees: codes already given do not change.
2. 2. Organization. Core Setting, in this order: Functions, Departments, Branches, Divisions, Sub-divisions, Designations. Check the Career levels. Then write and publish the JD & JS of each designation.
3. 3. Salary and statutory. Payroll > Salary structure for every designation and level (it needs the designations and the levels). Payroll > Statutory rules: confirm the PF, ESIC, PT, TDS and LWF values with your CA.
4. 4. Time office and leave. Core Setting > Shifts (with the attendance rules), Holidays, and the Leave types, quota and rules.
5. 5. Who sees what. Core Setting > Rights: check what Admin, HR, Manager and Employee see, before you give logins.
6. 6. Employees. Add Admin and HR first, then the managers, then the rest, with + Add employee or the bulk upload (use the codes from Download master codes). Add a manager before his team: a person gets the Manager login only if people already report to him.
7. 7. What follows the employees. Give every employee a reporting manager (and a functional manager if any). Give the logins: the user id is the employee number, the first password is shown once, so hand it over with the company code; set the HR and Manager roles in Core Setting > Accounts. Map the approval roles in Core Setting > Roles to real people (the ready roles point to sample people), then check the approval paths in Core Setting > Workflow. Then, for every employee, in Workforce > Onboarding: the shift, the statutory assignment (PF, ESIC, PT, TDS, LWF), the salary structure reaching him, the KYC documents, the KPIs (the KPI pack is built by Mirror-HR) and the appointment letter.
8. 8. First month. Get the attendance (machine, import or by hand), process the attendance of the month in Time Office, generate the variable pay (if Performance is on), then run payroll and approve it. Upload the company policies so that the HR Assistant can answer from them.
9. 9. Hiring, when you need it. Manpower plan, then Requisition, then Vacancy (it needs the JD & JS), candidates, the Offer (it needs the salary structure of the designation and level) and Mark joined (it needs the verified documents).

Good to know:

- What depends on what: an employee needs the organization chain and the code format. The offer letter, the CTC, the payslip and payroll need the salary structure. A vacancy needs a manpower plan row and the JD & JS. Leave and other approvals need the reporting manager, and the approval roles need real people. Payroll needs the attendance of the month processed, the salary structure, the statutory assignment and, if Performance is on, the variable pay.

The top bar: language, guide, bell, your name

Where: Top right of every screen

What it is: EN / हिं switches the language of the whole app. The book icon opens this User Guide. The bell shows your latest notifications. The key icon changes your password.

Why it is there: So that help, alerts and settings are one click away from any screen.

Who uses it: Everyone.

Step by step:

1. Press EN or हिं to change the language.
2. Press the book icon to read the guide. Type a word in the search box to find a topic.
3. Press the bell to see what is new. Your full list of work is in the Inbox.

The left menu (modules)

Where: Left side of every screen

What it is: Each bar on the left is a module. Press a module name to open it and see its sections. You see only the modules your company has taken and your role may open.

Why it is there: To keep the work of the company in one place, grouped the way people think about it.

Who uses it: Everyone.

Step by step:

1. On a computer, move the mouse over a module name, for example Payroll. Its sections open in a panel to the right of the menu.
2. Press a section in the panel to open that screen. The panel closes by itself. Press Esc or move the mouse away to close it without choosing.
3. Pressing the module name itself opens its first section. The module you are in is highlighted.
4. On a phone or a small screen, press the three-line button at the top left to open the menu. There a module opens downward when you press it.

Who can see and do what (roles) For HR and Admin

Where: Core Setting > Automation > Rights

What it is: There are four roles: Employee, Manager, HR and Admin. A manager sees his own team. HR and Admin set up the company. Admin always has full access.

Why it is there: So that salary, personal details and approvals reach only the right people.

Who uses it: HR and Admin set it. Everyone is affected by it.

Step by step:

1. Open Core Setting > Automation > Rights.
2. Choose a role at the top.
3. Tick or untick View, Add, Edit, Approve and Export for each page.

2. Dashboard

Your home screen: how you are doing, your target, what is waiting today, and what you earned.

Company today and Team today For HR and Admin

Where: Dashboard > Company today (Admin, HR) or Team today (reporting manager)

What it is: Filters for Function, Department, Branch, Division, Sub-division and Designation. Under them five boxes for one day: Total employees, Present, Absent, On leave and Weekly off / holiday, each with its percentage of the total. Below is a bar chart of the present percentage of each day.

Why it is there: So that the Admin can see in one look how any part of the company is attending, today and on the days before, without opening a report.

Who uses it: Admin and HR see the whole company. A reporting manager sees everybody who reports to them, directly or through others.

Step by step:

1. Open Dashboard. The first tab is Company today (Team today for a manager).
2. Choose one or more filters from the pills at the top. A pill turns green when it has a value, and Reset clears them all. For example Branch = Surat Store and Division = Sarees. The boxes and the chart change at once.
3. The boxes show today. Press a bar of the chart to see that day in the boxes.
4. Choose the period at the top right of the chart: the last 14 days, or a month.

Good to know:

- The percentage in the boxes is of the total employees. The percentage in the bars is of the people who had to work: weekly off, holidays and people without a shift are left out.
- For today, the Absent box is called “Not punched in yet”, because the day is not over.
- An employee who has no shift on that day is in the total but not in present or absent. A yellow note tells how many. Give them a shift in Time Office > Shift assignment.

My Performance

Where: Dashboard > My Performance

What it is: Your KPI score of the last months, your career level, your monthly pay potential and the KPIs you are strong or weak in.

Why it is there: So that you know every month how you are doing and what to improve, without asking anyone.

Who uses it: Every employee, including Admin, HR and managers (their own KPIs; the company or team attendance is in the first tab).

Step by step:

1. Open Dashboard. My Performance is the first tab (the second tab for Admin, HR and managers, after Company today or Team today).
2. Read the four boxes on top: latest KPI score, previous month, quarter average and performance band.
3. Read Top 3 strong KPIs and Top 3 to improve.

Good to know:

- Your first score appears only after your first month is closed.

My Target

Where: Dashboard > My Target

What it is: Your sales or work target for this month, how much is achieved, and how much you need each day to reach it.

Why it is there: So that you can plan the month day by day instead of finding out at the end.

Who uses it: Employees who have a target.

Step by step:

1. Open Dashboard > My Target.
2. See the target, the achieved amount and the percentage.
3. Read “needed today” to know how much to do today to stay on pace.

Today and requests

Where: Dashboard > Today and requests

What it is: What happens today: your attendance, leave balance, requests waiting for approval and quick actions.

Why it is there: So that the daily things are done from one place.

Who uses it: Everyone. A manager also sees the requests of the team.

Step by step:

1. Open Dashboard > Today and requests.
2. Check in or out, apply for leave or follow your requests from the boxes shown.

Salary Earned

Where: Dashboard > Salary Earned

What it is: Shows what your salary structure promised, what you actually earned, and exactly where you lost money: which KPI scored low, and how many days of absence.

Why it is there: So that you understand your salary and know what to improve to earn the full amount.

Who uses it: Every employee, for his own salary.

Step by step:

1. Open Dashboard > Salary Earned. The tab appears once your payroll exists.
2. Pick a month at the top.
3. Read the four boxes: could have earned, actually earned, difference, net pay.
4. Read “Where the difference came from” and the table “Which KPI cost you money”.

Good to know:

- When the month is not closed yet, the variable pay shows as pending. Nothing is lost until the KPI score is known.
- When your salary is paid, you get a notice in the Inbox with a link to this tab.

HR Assistant (policy chat)

Where: The "HR Assistant" button at the bottom right of every page

What it is: A chat that answers your questions about company policy (leave, attendance, travel, conduct …) only from the policies your company uploaded, and questions about using Mirror-HR (for example how to apply for leave) from this User Guide.

Why it is there: You get the rule at once, in your own language, with the policy name and section, without waiting for HR.

Who uses it: Every employee (when the HR Assistant module is on for the company).

Step by step:

1. Press "HR Assistant" at the bottom right.
2. Type your question in Hindi, Hinglish or English, or press one of the suggested questions.
3. Read the answer. Press the source chip under it to see the exact part of the policy (📄) or of the User Guide (📘). For the guide, "Open in User Guide" opens that entry.
4. Press 👍 or 👎 to tell HR whether it helped.
5. "History" shows your earlier chats; "+" starts a new chat.

Good to know:

- If the policy does not say it, the answer is "Is vishay par company policy me jaankari uplabdh nahi hai. Kripya HR vibhag se sampark karein."
- It does not work out your own salary and does not tell anything about other employees.
- Answers are based on company policy. The final decision is HR's.
- At most a few questions per minute can be asked.

3. Inbox

Everything that is waiting for you, from every module, in one list.

Game view (home map)

Where: Top bar > game button (next to the User Guide button)

What it is: A second look for the home page. The modules are shown as tiles on a map, each with one line that says what it is for and a red number of the items waiting there. Your Inbox shows as “Today's missions”. Nothing else changes: the pages, the data and the rights are the same.

Why it is there: So that a new person can see at once which module does what, and what must be done today.

Who uses it: Everyone. Each person chooses Game view or Classic view for himself; the choice is saved with his login, so it is the same on every phone and computer.

Step by step:

1. Press the game button in the top bar. The home page becomes the map.
2. Press a tile to open that module. Press “Map” on top of the page to come back.
3. Press a mission to open the work. The label shows the last date: today, tomorrow or overdue.
4. Choose one of the two colours with the round buttons: Teal Night + Gold or Sky Day + Coral.
5. Press “Classic view”, or the game button again, to go back to the usual Dashboard.

Good to know:

- The top strip shows your career level, your KPI score of the month so far (only the KPIs already scored), the days in a row you came on time this month, and the missions waiting.
- The ranking lists everyone of your division with the KPI score so far. A person with no division sees the whole company.
- The bar at the bottom opens the most used work in one press: punch, leave, payslip, ticket, Inbox and the HR Assistant.
- In Game view the Leave page starts with a guide block. “Where is your leave now?” shows your request as a path: You applied, Approval (with the name of the person it is waiting with), Leave granted or Rejected. It shows your oldest waiting request; if none is waiting, your latest leave of the last 7 days; if there is none, how a leave moves. Under it is one card for every section you may open (Apply for leave, My balance and history, Approve team leave, Short leave, Encash leave, Holidays) with one line on what it is for, and a “Good to know” line. The usual Leave page is below, unchanged.
- Every other module page has the same kind of guide block in Game view: the name of the module with one line on what it is for, “How the work moves here” as a path of 3 to 5 steps, and a card for every section of the page that you may open, with its line from this User Guide. The card of the section you are on says “You are here”. When a page has more than 8 sections, “Show all sections” opens the rest. On Attendance requests, Location requests, Payroll (salary advance), Expense, My Asset and Exits the path shows your own waiting request and who it is with. “Hide guide” folds the block of that page; “Show guide” brings it back.
- Badges of the month are on the map, under the ranking, and counted in the top strip. There are seven, all worked out from your real records of the running month: On time (no late day, at least 5 days present), Full attendance (no absent day, at least 5 days present), 7-day streak (7 working days in a row on time), Inbox hero (at least 3 Inbox items finished and none late or overdue), KPI 90+ (KPI score so far 90 or more), Top 3 (first three of your division, when it has 4 or more people) and Learner (a course certificate this month). Press a badge or “How to earn them” to see each rule and where you stand now. A badge can go away again in the same month, for example after a late day. Badges start again every month.
- When you get a new badge, or your career level goes up, the map shows a short celebration once. Press anywhere to close it. It is shown once, on whichever phone or computer you open the map first. Badges have no effect on KPI score, salary or attendance.

- For Admin and HR: Reports > PMS > “Badges of the month (employee-wise)” lists every employee with each badge, by month. The running month is worked out when the report is opened. An earlier month shows what was saved: badges are saved once a day when Admin or HR opens Mirror-HR (up to 150 employees), and by the Scheduler job “Save the badges of the month for every employee”. A month in which nobody saved them shows no badges. A manager sees his own team.

My tasks

Where: Inbox > My tasks

What it is: One list of your work. It is in three parts: what needs your decision, what you have to do, and what is only for your information. Each row says in one word what you must do and gives the right button.

Why it is there: So that nothing is missed and you never have to hunt through the modules to find what is waiting.

Who uses it: Everyone. You see only what is with you. Others cannot see your items.

Step by step:

1. Open Inbox. Start from the top: “Needs your decision” first, then “You have work to do”, then “For your information”.
2. For an approval, press Approve to approve at once, or “Details / Reject” to read it and give a remark. A remark is needed to reject.
3. For work, press the button on the row (for example “Open and verify”). It takes you to the screen where the work is done. The item leaves your Inbox by itself when the work is done.
4. For information, read it and press Read.
5. To approve many at once, tick the approvals and press “Approve selected”.

Good to know:

- The three boxes on top show how many items are in each part. Press a box to show only that part.
- Under each row you can read who sent it and why it came to you, for example “WF-030, step 2: you are Division Manager”.
- Late items come first.
- Every item has a last date, shown in the Due column. An item that has its own last date keeps it (for example a training test or a trip report). Every other item gets the day it came plus working days: an approval or other work 2, an acknowledgement (letter, decision, document, asset, notice board) 3, a notice to read 2. Sundays and holidays are not counted. Admin and HR change these days in Core Setting > SLA master, SLA-053.
- The Due column shows “due tomorrow”, “due today” or “overdue” next to the date. Finish, acknowledge or read the item on or before the last date.
- KPI-399 “Inbox Tasks Done Before Due %” is worked out by the system from this list: items finished on or before the last date ÷ items whose last date has come × 100. An item finished late, or still open after the last date, counts as late. To Do items and Today's Challenge are not counted here (they have their own KPI). It is counted for items due from 1 December 2026. HR assigns the KPI in PMS > KPI assignment, like every other KPI; it scores only for the people it is assigned to.
- An item of another module is noted as finished on the day you open Mirror-HR after finishing it. Reports > PMS has “Inbox TAT report (employee-wise)” and “Inbox items (item-wise, with last date)”, both by month.

Sent by me

Where: Inbox > Sent by me

What it is: The approvals you started, and with whom each one is now.

Why it is there: So that you can follow your request without asking anyone.

Who uses it: Everyone who has started an approval.

Step by step:

1. Open Inbox > Sent by me.
2. Read “Now with” to see who must act.
3. Press Trail to see every step and remark.

All approvals For HR and Admin

Where: Inbox > All approvals (HR and manager)

What it is: Every approval of the company with its flow, step and status.

Why it is there: So that HR can see where an approval is stuck.

Who uses it: HR and managers.

Step by step:

1. Open Inbox > All approvals.
2. Find the approval and press Trail to see who has it now.

Good to know:

- Which steps an approval has, and who approves each step, is set in Core Setting > Automation > Workflow.

Scheduler For HR and Admin

Where: Inbox > Scheduler (HR and manager)

What it is: The reminders and escalations that run on a timer, for example expiring advance requests or closing training tests. You can run each one by hand here.

Why it is there: So that overdue things do not wait for someone to remember.

Who uses it: HR and managers.

Step by step:

1. Open Inbox > Scheduler.
2. Press Run next to a job, or Run all.

4. Employees

The list of everyone who works in the company and the form to add or change a person.

Employee list

Where: Employees

What it is: All employees with function, department, branch, division, sub-division, designation, career level and status. A blank career level means it is not set yet. You can search by name, code or mobile, and filter by branch and department.

Why it is there: It is the master record of people. Payroll, attendance, KPI and every other module read from it.

Who uses it: HR and Admin. A manager sees his own team.

Step by step:

1. Open Employees.
2. Type a name, code or mobile in the search box.
3. Press View to read the full record. Press Cockpit to see the full picture of that person.
4. Press Export CSV to download the list.

Add or edit an employee For HR and Admin

Where: Employees > + Add employee

What it is: The form for a new employee or for changes. The job section follows the Organization structure in one order: Function, Department, Branch, Division, Sub-division, Designation. Each list shows only what is valid under the choice above it.

Why it is there: So that a person can only be placed in a position that exists in the company structure.

Who uses it: HR and Admin.

Step by step:

1. Open Employees and press + Add employee.
2. Fill name, mobile, email, date of birth, gender and the highest education (chosen from a list: Below 10th, 10th pass, 12th pass, ITI, Diploma, Graduate, Post graduate (PG), Doctorate (PhD), Professional (CA, CS, CMA, LLB...) or Other; the course or stream is optional), then the date of joining. The education is shown in My Profile > Personal.
3. Choose Function, then Department, Branch, Division, Sub-division and Designation, in that order.
4. Choose the reporting manager and the functional manager. The career level is left blank: HR sets it later, when setting the salary structure.
5. Fill statutory and bank details if known, then Save.

Good to know:

- If a Designation is missing in the list, it must first be added in the Organization structure. See Workforce > Organization structure.
- The career level is not asked when a person is added, whether by this form or by the bulk upload: as soon as an employee has no salary structure for the career level, a task to set it goes to HR and Admin's Inbox (Payroll > Salary structure). The level can still be set directly on this form at any time.
- Two more Inbox tasks keep step with it for a new employee, by bulk upload, + Add employee or recruitment alike: "Set the statutory assignment" (Payroll > Statutory assignment) as soon as PF, ESIC, PT, TDS and LWF are not yet set, and "Complete onboarding" for whichever of the other onboarding steps (KYC, KPI, reporting manager, shift, appointment letter) are still open, pointing to Workforce > Onboarding. Salary and statutory each have their own task and are not repeated in this one.

Bulk change of manager For HR and Admin

Where: Employees > Bulk change manager

What it is: Changes the reporting manager, the functional manager or both for many employees in one request. It goes through the approval workflow WF-030 (HR starts it, the Division Manager approves).

Why it is there: When a manager leaves or a team is reorganised, changing people one by one is slow and error-prone.

Who uses it: HR starts it. The Division Manager approves.

Step by step:

1. Open Employees and press Bulk change manager.
2. Choose a group (function, department, branch, division, designation or current manager), or paste employee codes like E004, E005.
3. Untick anyone who should not change.
4. Tick what to change and choose the new manager. Write the reason.
5. Press Send for approval.

Good to know:

- When it is approved, the pending work the earlier manager holds for these employees moves to the new manager.
- A person cannot become his own manager, and two people cannot be managers of each other.

5. Workforce

The structure of the company and how people join, stay and leave.

Organization structure

Where: Workforce > Organization structure

What it is: A chart of the whole company from top to bottom: Company, Function, Department, Branch, Division, Sub-division and Designation. Each designation shows how many are planned and how many are working.

Why it is there: It is the base of everything. A designation can enter the Manpower plan, then a Requisition, then Recruitment, only if it exists here. Nobody can create a designation in the plan or in recruitment.

Who uses it: Everyone can read it. Admin and HR with the right to add can build it. We build it for each client when the ERP is given.

Step by step:

1. Open Workforce > Organization structure.
2. To add something, press the small + button under a box: under Company add a Function, under a Function add a Department, under a Department add a Branch, under a Branch add a Division, under a Division add a Sub-division, under a Sub-division add a Designation.
3. The form opens with the parent already chosen. Write the name and Save. A designation has no level: the career level is chosen for each person when making the offer in Recruitment and when giving a salary structure.
4. To edit or inactivate something, press Edit structure in Settings.

Good to know:

- A function, department, branch, division, sub-division or designation that is used in the manpower plan, in a requisition that waits or in an open vacancy cannot be inactivated. The screen shows where it is used.
- A designation is mapped under Divisions, not under one Sub-division: in Core Setting > Designations tick the Divisions where the post exists (it then works in all their sub-divisions). Only if it is needed in some sub-divisions alone, tick those small boxes under the Division. One designation can be ticked under many Divisions. A new Division is added to the shared sub-division called General automatically.
- A new Branch is created from Core Setting > Branches, because the chart shows one company at a time.

Attrition and retention For HR and Admin

Where: Workforce > Attrition and retention

What it is: For a period you choose: headcount at the start and the end, joiners, exits, the attrition percentage and the retention percentage. The same table is shown by branch, by division and by designation. At the bottom is a list of employees who may leave, with risk points and the reasons.

Why it is there: So that HR can see problems in time, by branch, division or designation, and talk to the people at risk before they leave.

Who uses it: HR, Admin.

Step by step:

1. Open Workforce > Attrition and retention.
2. Choose the period at the top (last 12 months, financial year or one month).
3. Read the four boxes. Press a box (for example Exits) to see the names.
4. Read the tables by branch, division and designation. Press a number to see who it is.
5. Read the risk list at the bottom and plan a talk with the high-risk people.

Joining to retention For HR and Admin

Where: Workforce > Joining to retention

What it is: One row for each month in which people joined (last 12 months): how many joined, how many stayed beyond the retention window, how many left inside it, how many are still inside it, and the retention percentage.

Why it is there: To see if the hiring and the first days of the new people are working.

Who uses it: HR, Admin.

Step by step:

1. Open Workforce > Joining to retention.
2. Read the row of a month: joiners, retained, left, still in the window.
3. The retention percentage appears when no one of that month is still inside the window.

Good to know:

- The length of the retention window (in days) is a number in Core Setting > Rules and numbering > SLA.

Uniform and ID card For HR and Admin

Where: Workforce > Uniform & ID card

What it is: A register of who has been given a uniform and an ID card, and on what date.

Why it is there: So that new joiners are not forgotten and the date of handover is on record.

Who uses it: HR.

Step by step:

1. Open Workforce > Uniform & ID card.
2. Find the employee and enter the date the uniform or ID card was given.

Onboarding and KYC

Where: Workforce > Onboarding & KYC

What it is: The documents of each new employee (identity, address, bank) and their check. A document the employee uploads is verified by HR.

Why it is there: So that the records are complete and checked before the first salary.

Who uses it: The employee uploads. HR verifies.

Step by step:

1. The employee opens his own onboarding and uploads each document.
2. HR opens Workforce > Onboarding & KYC, reads the document and marks it verified.

Good to know:

- A document waiting for verification appears in the Inbox of HR as “Verify KYC documents”.

6. Recruitment

From the manpower plan to the day the new person joins: plan, requisition, vacancy, candidate, interview, offer and joining.

Overview For HR and Admin

Where: Recruitment > Overview

What it is: Open vacancies, positions to fill, candidates in the pipeline, requisitions waiting, the pipeline by stage, where the shortage is and the scorecard of each recruiter. It also shows the public career page link.

Why it is there: One look tells HR where hiring is stuck.

Who uses it: HR and Admin.

Step by step:

1. Open Recruitment. Overview is the first tab.
2. Press a box (for example Open vacancies) to jump to that list.
3. Read “Where is the shortage?” and check that every shortage has a vacancy and a recruiter.

Manpower plan

Where: Recruitment > Manpower plan

What it is: The number of people the company wants in each position: for each function, department, branch, division, sub-division and designation, with the hiring level and the date from which it applies. Shortage and surplus are worked out row by row.

Why it is there: Hiring starts from the plan. A shortage in the plan creates a requisition by itself. Nobody is hired for a position that is not in the plan.

Who uses it: HR and Admin add and change rows. Other people can read.

Step by step:

1. Open Recruitment > Manpower plan.
2. Press + Add plan row.
3. Choose Function, Department, Branch, Division, Sub-division and Designation. Each list shows only what exists in the Organization structure.
4. Enter the required headcount, the hiring level and the date it applies from. Save.
5. The row goes for approval (workflow WF-012). It becomes active when approved.

Good to know:

- You can also upload many rows from a file (Template, then Upload plan) and download the plan with Export.
- A designation that is not in the list must first be added in Workforce > Organization structure. It cannot be created here.
- A salary structure must be set for the designation and level, otherwise the row is refused.

Requisitions

Where: Recruitment > Requisitions

What it is: A request to hire for a shortage of the approved plan. A shortage creates one by itself; HR can raise one by hand; a manager can raise one for his own branch. Additional manpower beyond the plan is requested separately.

Why it is there: So that every hire is asked for, approved and tracked.

Who uses it: Managers and HR raise. The approvers set in the workflow approve.

Step by step:

1. Open Recruitment > Requisitions.
2. Press + New requisition and choose the plan row that has a shortage.
3. Enter the number of positions, the reason (new position or replacement) and a note. Save.
4. It goes through the approval workflow. When approved, a vacancy opens by itself.

Good to know:

- For people beyond the plan, press Additional manpower. The list of designations shows only those that exist in the Organization structure for that branch. HR then adds it to the manpower plan.

Vacancies For HR and Admin

Where: Recruitment > Vacancies

What it is: The open positions made from approved requisitions, with the number filled, the date opened, the target date and the recruiter.

Why it is there: It is the list the recruiter works on. Late vacancies show in red. A vacancy opens only when the designation has a published JD and JS; until then the approved requisition waits and HR gets an Inbox task.

Who uses it: HR and recruiters.

Step by step:

1. Open Recruitment > Vacancies.
2. Press Hold to pause a vacancy, Reopen to start it again, or Close when it is filled or no longer needed.

Good to know:

- A vacancy cannot be created by hand. It always comes from an approved requisition.

Candidates

Where: Recruitment > Candidates

What it is: Everyone who applies, from first contact to joining. A candidate moves through the stages Applied, Screening, Interview, Selected, Offered and Joined. People come from the public career page, from referrals by employees, or are added by HR.

Why it is there: So that every candidate is tracked and no one is lost between steps.

Who uses it: HR and recruiters. Any employee can refer someone.

Step by step:

1. Open Recruitment > Candidates and press + Candidate (or share the career page link).
2. Choose the vacancy, enter the name, mobile, email, the highest education (from the list, with the course or stream if known) and the source. Upload the resume file.
3. Open the candidate and move him to the next stage: Screening, Interview, Selected.
4. A candidate who was Rejected or Dropped can be brought back into the pipeline with the button on his record.

Good to know:

- A candidate who joins becomes an employee, and the education he gave on the career page or in the joining form (or that HR entered) goes to his employee record; HR can correct it when marking him joined. Everyone chooses the education from the same list. Mobile and email are matched so that a person who worked here earlier is noticed.

Interviews

Where: Recruitment > Interviews

What it is: The interviews that are scheduled and done, with the interviewer, the date and the feedback.

Why it is there: So that the decision to select or reject is based on written feedback.

Who uses it: HR schedules. The interviewer gives feedback. A manager sees the interviews of his branch.

Step by step:

1. Open a candidate and press Schedule interview. Choose the interviewer and the date.
2. After the interview, the interviewer opens Recruitment > Interviews (or the Inbox item “Interview feedback”) and gives his rating and remark.

Offers For HR and Admin

Where: Recruitment > Offers

What it is: The offer letter for a selected candidate: a PDF on the company letterhead. HR can send it, accept it for the candidate, or revoke it. The candidate fills his joining details through a link. The offer letter carries the JD and JS of the designation as an annexure, and the joining link shows them to the candidate.

Why it is there: So that the terms are written, sent and recorded before the joining day.

Who uses it: HR.

Step by step:

1. Open the selected candidate and press Make offer. Check the salary shown for the level.
2. Press PDF to download the offer letter. Send it to the candidate.
3. When the candidate agrees, mark the offer Accepted. If it must be cancelled, press Revoke and write the reason.
4. Press the joining link button and send the link. The candidate fills his details and uploads his documents on the joining day.
5. When the person joins, press Join. An employee record is made.

Good to know:

- The Revoke button shows only while the offer is Offered. After joining it is not shown.

Recruiters For HR and Admin

Where: Recruitment > Recruiters

What it is: Which employee is the recruiter of which branches, with his score for the month (KPI-199).

Why it is there: So that every vacancy of a branch goes to a named person.

Who uses it: HR and Admin.

Step by step:

1. Open Recruitment > Recruiters and press + Assign recruiter.
2. Choose the employee and tick his branches. Save.

Good to know:

- A warning shows when some branch has no recruiter.

Reports For HR and Admin

Where: Recruitment > Reports

What it is: The time taken to fill a vacancy, the offer acceptance rate, candidates and joiners by source, the work of each recruiter and the referrals.

Why it is there: To see which source and which recruiter bring people, and how fast.

Who uses it: HR and Admin.

Step by step:

1. Open Recruitment > Reports and read the tiles and tables.

7. Time Office

Shifts, daily attendance check, missed punches, the monthly attendance processing and overtime. Follow the tabs in this order during the month.

Shift assignment For HR and Admin

Where: Time Office > Shift assignment

What it is: Gives each employee a shift (start time, end time, grace minutes) from a date, with a weekly off. Attendance compares the punches with this shift to decide present, late, half day or absent.

Why it is there: Without a shift the system cannot know when a person should come.

Who uses it: HR and Admin.

Step by step:

1. To give a shift to one person: open Time Office > Shift assignment, press + Add shift assignment, choose the employee, the shift, the dates, the weekly off and “repeat every month”. Save.
2. To give one shift to many people: press Bulk assign. Choose a group (function, department, branch, division, designation) or paste employee codes. Untick who should not get it. Choose the shift, dates and weekly off. Press Assign.
3. A list shows anyone who was skipped and why (for example a shift already exists on those dates).

Good to know:

- The shifts themselves (names and timings) are made in Core Setting, not here.
- A shift cannot be given before the date of joining.

Attendance check

Where: Time Office > Attendance check

What it is: The daily work of a manager: look at the in and out punches of your team for the day before and press Verify. Anyone with a missed or wrong punch is shown. You can write a note or ask the person to regularize.

Why it is there: So that mistakes are caught the next morning, not at the month end. The score of KPI-033 comes from this.

Who uses it: Every manager.

Step by step:

1. Open Time Office > Attendance check every working day.
2. Open yesterday. Read the status, in time and out time of each reportee.
3. For a missed or wrong punch, write a note or press “Ask to regularize”.
4. Press “Verify the day”. Verify before 11:30.

Good to know:

- If you were on leave or off, verify all the days together on your next working day.
- A punch left without action gives only half credit for the day.

Punch exceptions For HR and Admin

Where: Time Office > Punch exceptions

What it is: The days with a missed or wrong punch: only an IN with no OUT, or no punch at all.

Why it is there: A day left as it is counts as Absent or half credit. Fix these before the month is processed.

Who uses it: HR and managers.

Step by step:

1. Open Time Office > Punch exceptions.
2. For each day, ask the employee to raise an attendance regularization, or correct it if you have the right.

Attendance processing For HR and Admin

Where: Time Office > Attendance processing

What it is: The monthly processing of attendance in six steps: 1 Check, 2 Month attendance, 3 Comp-off and off-day work, 4 Correction (days), 5 Overtime hours, 6 Overtime hours of earlier months. Each step has a button, a View to see who is covered, and a tick when nothing is pending.

Why it is there: It turns the daily punches into the paid days and hours of the month. Attendance works only with days and hours. Every rupee amount is made in Payroll.

Who uses it: HR and Admin.

Step by step:

1. Open Time Office > Attendance processing and choose the month at the top.
2. Step 1 Check is required. Press it and fix what it shows (missed punches, people without a shift).
3. Step 2 Month attendance is required. Press it to process the days of the month.
4. Steps 3 to 6 are only when needed: comp-off for working on a weekly off or holiday, corrections of earlier months in days, and overtime hours.
5. Press View on a step to see the list of people covered. A tick means nothing is pending.

Good to know:

- If someone joins late or an attendance is changed after processing, the button of that step comes back by itself, only for that person.
- Settings of this page (overtime rules, comp-off expiry) are in the gear button on the page.

Overtime and extra pay For HR and Admin

Where: Time Office > Overtime & extra pay

What it is: The overtime and off-day work found in attendance, as lines of hours or days. A line goes to its approver. The approver sees hours, not money. The money is worked out in Payroll.

Why it is there: So that extra work is approved by the right person and paid in the right month.

Who uses it: HR sends. The approver set in the workflow approves.

Step by step:

1. Open Time Office > Overtime & extra pay.
2. Check the lines of the month. Send them for approval.
3. Approved lines are paid through Payroll. A line not approved moves to the next month.

8. Payroll

Salary from the attendance of the month to the payslip in the employee's hand: structure, processing, verification, payment and publishing.

Monthly payroll For HR and Admin

Where: Payroll > Monthly payroll

What it is: The processing of a month's salary in numbered steps: 1 Check, 2 Correction amount, 3 Salary revision arrear, 4 Earlier overtime, 5 This month overtime, 6 Off-day pay, 7 Attendance allowance, 8 Process, 9 Verify, 10 Release, 11 Publish, 12 and 13 Reimbursement release and publish. Each step has a button, a View to see who is covered, and a tick when nothing is pending.

Why it is there: It is the one place where all amounts of the month are made. Attendance gives days and hours, Payroll turns them into money.

Who uses it: HR and Admin run it. A person set as Salary Verifier verifies. Accounts record the payment.

Step by step:

1. Open Payroll > Monthly payroll and choose the month at the top.
2. Step 1 Check: press it and clear what it shows.
3. Steps 2 to 7: press the button of each step when there is something in it. These make lines such as arrear, overtime pay, off-day pay and allowance. Lines wait for approval (workflow WF-029).
4. Step 8 Process: makes the salary of everyone.
5. Step 9 Verify: the Salary Verifier checks the figures. Without this, the bank file and the payslips cannot be made.
6. Step 10 Release: Accounts credit the salary and enter the UTR (HR or Admin can too). Step 11 Publish: payslips become visible to employees.
7. Steps 12 and 13 do the same for reimbursements.

Good to know:

- Everything that was not approved moves to the next month.
- A new joiner in a month already processed is processed alone. There is no separate “late joining arrear”.
- The people who verify and the workflow that approves lines are set in Core Setting > Automation > Roles and Workflow.

Salary advance

Where: Payroll > Salary advance

What it is: Requests of employees to take part of the salary in advance, repaid in installments from the coming salaries.

Why it is there: So that an advance is approved, paid and recovered properly.

Who uses it: The employee asks. The approvers approve. HR or Accounts pay.

Step by step:

1. The employee opens Payroll > Salary advance and asks for an amount and the number of installments.
2. The approvers approve it (it shows in their Inbox).
3. HR pays it (Inbox: “Disburse advance”). The installments are cut from the next salaries.

Salary earned For HR and Admin

Where: Payroll > Salary earned

What it is: HR and managers can pick any employee and see what the structure promised, what was earned and where the difference came from (absence, KPI, retention). The same view is on every employee's own Dashboard.

Why it is there: To explain salary to an employee who asks “why is it less”.

Who uses it: HR, Admin, managers.

Step by step:

1. Open Payroll > Salary earned. Choose the employee and the month.
2. Read the four boxes and “Where the difference came from”.

Incentives For HR and Admin

Where: Payroll > Incentives

What it is: The incentive structures given to employees (for example a sales incentive) and their approval.

Why it is there: So that an incentive is paid only to those it was approved for.

Who uses it: HR sets. The approvers approve.

Step by step:

1. Open Payroll > Incentives and assign a structure to an employee.
2. It goes for approval. After approval it is counted in the payroll of the month.

Payments For HR and Admin

Where: Payroll > Payments

What it is: The register of all payments: salary, advance and final settlement, with the amount, what is paid, what is outstanding, the status and the UTR.

Why it is there: A payment becomes “Paid” only with a confirmed UTR and a date. A bank file alone never makes it Paid.

Who uses it: Accounts, HR and Admin.

Step by step:

1. Open Payroll > Payments. Press Create bank file to give the bank the list (the salary must be verified first).
2. After the bank pays, press Record payment on the row. Enter the amount, the UTR and the date. No file is to be uploaded.
3. If the bank returned the money, press Bank return.

Good to know:

- When a salary becomes Paid, the employee gets a notice in the Inbox: “Your salary is released. Check your Salary Earned.”
- A payment is Held when the employee's bank details are not verified.

Final settlement For HR and Admin

Where: Payroll > Final settlement

What it is: The last account of an employee who is leaving: pending salary, leave encashment, recoveries and the final amount. It is prepared by one person and approved by another.

Why it is there: So that no dues are missed and the exit is closed correctly.

Who uses it: HR prepares. A different approver approves. Accounts pay.

Step by step:

1. Open Payroll > Final settlement and open the employee's settlement.
2. Check the lines and add an adjustment if needed (with a reason).
3. Send it for review. The approver approves it. Payment is recorded in Payroll > Payments.

Good to know:

- A warning shows if the exit interview is not done or assets are not returned.

Payslips For HR and Admin

Where: Payroll > Payslips

What it is: The payslips of a month for HR to view and publish.

Why it is there: An employee sees his payslip only after it is published.

Who uses it: HR and Admin.

Step by step:

1. Open Payroll > Payslips and choose the month.
2. Open a payslip to read it. Publishing is done in Monthly payroll, step 11.

Bank details For HR and Admin

Where: Payroll > Bank details

What it is: The bank details of employees and changes asked for. A change must be verified by a person other than the one who made it.

Why it is there: So that salary never goes to a wrong account.

Who uses it: HR and Admin.

Step by step:

1. Open Payroll > Bank details. A change waiting for checking appears in the Inbox as “Verify a bank detail change”.
2. Check the account number and IFSC and mark it verified.

Tax declarations For HR and Admin

Where: Payroll > Tax declarations

What it is: The investment and tax declarations that employees submit, for HR to check and verify.

Why it is there: So that the TDS (income tax) cut from salary uses the right figures.

Who uses it: The employee submits (My tax). HR verifies.

Step by step:

1. Open Payroll > Tax declarations and open a declaration.
2. Read the amounts and the proofs. Verify or send it back.

Good to know:

- After HR verifies, the employee cannot change the declaration.

Statutory rules For HR and Admin

Where: Payroll > Statutory rules

What it is: The rates and limits of PF, ESIC, professional tax, TDS and bonus, with the date from which each rate applies.

Why it is there: So that every deduction follows the law and a change of rate does not alter the past months.

Who uses it: HR and Admin. The CA confirms the rates.

Step by step:

1. Open Payroll > Statutory rules.
2. Choose the rule, press Edit, enter the new rate and the date it applies from.

Wage rules For HR and Admin

Where: Payroll > Wage rules

What it is: The minimum wage rules by state or zone against which salaries are checked.

Why it is there: So that no salary is below the legal minimum.

Who uses it: HR and Admin.

Step by step:

1. Open Payroll > Wage rules and read or update the minimum for each state or zone.

Statutory assignment For HR and Admin

Where: Payroll > Statutory assignment

What it is: Decides for each employee which statutory items apply: PF, ESIC, professional tax, TDS and bonus, with the UAN and ESIC numbers. A change goes for approval (workflow WF-011).

Why it is there: The same salary structure can have different statutory items for different people. This is how a person is switched on or off for an item.

Who uses it: HR sets. The Division Manager approves.

Step by step:

1. Open Payroll > Statutory assignment and open the employee.
2. Choose Yes or No for PF, ESIC, professional tax, TDS and bonus. Enter UAN and ESIC numbers if PF or ESIC applies. Choose the date it applies from.
3. Save. It goes for approval.

Salary structure For HR and Admin

Where: Payroll > Salary structure

What it is: How a salary is divided for each designation and each career level: Basic, PGP, incentive, PLI, retention, CCA and special allowance. It is the base of every offer and every salary.

Why it is there: So that a person's pay depends on his designation and level, not on a number typed each time.

Who uses it: HR and Admin set it.

Step by step:

1. Open Payroll > Salary structure.
2. Choose the designation and the level. Fill each component and Save.

Good to know:

- A designation without a structure cannot be put in the manpower plan.

Employee salary For HR and Admin

Where: Payroll > Employee salary

What it is: Every employee's monthly salary, split into its parts, with the PF and ESIC of the employer. Each row has a Revise salary button. Below, the list of revisions with their status.

Why it is there: To check what each person earns and to raise a salary in between growth decisions.

Who uses it: HR and Admin with the right to edit payroll.

Step by step:

1. Open Payroll > Employee salary and find the employee.
2. Press Revise salary. Enter the increase a month (it is added to Basic), the month from which it applies, and the reason. A past month is allowed.
3. Press Send for approval (workflow WF-008).
4. When approved, the salary changes from that month. If the month is in the past, the arrear is made in Monthly payroll step 3.

Good to know:

- A regular increase comes from a career growth decision (PMS > Career growth). This button is for an extra increase.

My payslip

Where: Payroll > My payslip

What it is: Your own payslips, month by month.

Why it is there: So that you can read and keep your payslip without asking HR.

Who uses it: Every employee.

Step by step:

1. Open Payroll > My payslip.
2. Choose the month and read earnings, deductions and net pay.

Good to know:

- A payslip shows only after HR has published it.

My tax

Where: Payroll > My tax

What it is: Your income tax: how much is cut every month and your investment declaration.

Why it is there: So that your declaration reaches HR in time and your TDS is right.

Who uses it: Every employee.

Step by step:

1. Open Payroll > My tax.
2. Fill your declaration, attach the proofs and submit.

9. Core Setting

Where the company is set up: its structure, rules, shifts, templates, workflows and who can do what. Almost every “where is it set” answer is here. HR and Admin only.

General For HR and Admin

Where: Core Setting > Organization > General

What it is: The overview page of the company structure with the counts of functions, departments, branches, divisions, sub-divisions, designations and career levels.

Why it is there: A quick look at the structure.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Organization > General.

Functions For HR and Admin

Where: Core Setting > Organization > Functions

What it is: The top level under the company, for example HR and Admin, Finance, Sales. It has a code (FN001), made automatically when you Save.

Why it is there: The structure order is Company, Function, Department, Branch, Division, Sub-division, Designation.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting and choose the group on the left, then the tab.
2. Press + Add to make a new one, or Edit on a row to change it.
3. To stop using one, press Inactivate. Nothing is deleted.

Good to know:

- You can also add from the chart in Workforce > Organization structure.

Departments For HR and Admin

Where: Core Setting > Organization > Departments

What it is: Departments, each under one or more functions. It has a code (DP001), made automatically when you Save.

Why it is there: To group the work inside a function.

Who uses it: HR and Admin.

Step by step:

1. Press + Add. Write the name and choose the function(s) it belongs to.
2. Save.

Branches For HR and Admin

Where: Core Setting > Organization > Branches

What it is: The places of work (stores, offices) with city, state and zone. Each branch is under one or more departments. It has a code (BR001), made automatically when you Save.

Why it is there: Employees, shifts, holidays and attendance are by branch.

Who uses it: HR and Admin.

Step by step:

1. Press + Add. Write the name, city and state, and choose the department(s).
2. Save.

Good to know:

- A new branch is made here, not in the chart.

Divisions For HR and Admin

Where: Core Setting > Organization > Divisions

What it is: Business divisions (for example Sarees, Ladies Wear, Mens Wear) under branches. It has a code (DV001), made automatically when you Save.

Why it is there: Sales targets, feedback and KPIs are by division.

Who uses it: HR and Admin.

Step by step:

1. Press + Add. Write the name and choose the branch(es).
2. Save.

Sub-divisions For HR and Admin

Where: Core Setting > Organization > Sub-divisions

What it is: A split inside a division, for example a counter or a section. One sub-division called General is shared by all divisions: a new division is added to it, so you do not need to make one for each division. It has a code (SD001), made automatically when you Save.

Why it is there: Designations hang under Divisions (all their sub-divisions, or only the sub-divisions you tick). A designation has no level of its own.

Who uses it: HR and Admin.

Step by step:

1. Press + Add. Write the name and choose the division.
2. Save.

Designations For HR and Admin

Where: Core Setting > Organization > Designations

What it is: Every position in the company, under one or more Divisions. It has no level: the career level is chosen for each person in Recruitment (when making the offer) and when a salary structure is given. A person can be placed, planned for, requested and hired only in a designation that exists here. It has a code (DG001), made automatically when you Save.

Why it is there: A designation is made in one place only, so the plan, the requisition and the recruitment can never disagree.

Who uses it: HR and Admin.

Step by step:

1. Press + Add. Write the name and tick the Division(s) where the post exists. Tick the small sub-division boxes only if it is needed in some of them.
2. Save. Then set its salary structure in Payroll > Salary structure.

Good to know:

- A designation used in the manpower plan, in a requisition that waits or in an open vacancy cannot be inactivated.

JD & JS of a designation For HR and Admin

Where: Core Setting > Organization > JD & JS of a designation

What it is: The job description (JD: purpose, key responsibilities, who the person reports to) and the job specification (JS: education, experience, skills) of a designation, written once, with versions. HR can also attach a PDF or Word file. It is used in the requisition, the vacancy, the career page, the offer letter, the joining link and in the employee's own profile, where the employee acknowledges it.

Why it is there: So that everyone knows what the post is, before hiring and after joining, and so that there is a record that the person has read it. A vacancy cannot open for a designation that has no published JD and JS.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Designations and press JD & JS against the designation.
2. Write the purpose, the key responsibilities (one on each line) and at least one of education, experience or skills. The minimum education is chosen from a list (Below 10th, 10th pass, 12th pass, ITI, Diploma, Graduate, Post graduate (PG), Doctorate (PhD), Professional (CA, CS, CMA, LLB...) or Other); you may add the course or stream, such as B.Com. Press Save draft to keep it for later, or Publish to make it the current JD and JS.
3. To change it later, open the same window, change and Publish. It becomes a new version; the old one is kept, and every employee in that designation gets a task to acknowledge the new version.
4. The list shows the current version and how many have acknowledged it (for example 3/5). Reports > Employees > JD & JS acknowledgement shows who is pending.

Good to know:

- When a requisition is approved and the designation has no published JD and JS, the vacancy waits. HR gets an Inbox task to publish it, and the vacancy opens by itself after that.
- The offer letter carries the JD and JS as an annexure. The joining link and the career page show a summary.
- The employee reads it in My Profile > JD & JS and presses “I have read and understood”. The task is in the Inbox from the day of joining and shows late after 7 days; HR sees a reminder in the Inbox. A new version, or a change of designation, asks for a new acknowledgement. The level is not part of the JD: it only matters for growth and salary.

Career levels For HR and Admin

Where: Core Setting > Organization > Career levels

What it is: The twelve levels L1 to L12 used for career growth and salary.

Why it is there: The salary structure and growth decisions work by level.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Organization > Career levels and read or rename a level.

Theme For HR and Admin

Where: Core Setting > Look > Theme

What it is: The colours and shapes of the whole app (sidebar, buttons, cards), for everyone in the company and also the sign in page. Eight looks: the three plain ones (Teal Night + Gold, Indigo Royal, Midnight Navy + Mint) and five art looks (Warli Art, Paper Cut Art, Sand Art, Watercolor Art, Clay Art), each with its own card corners and button shape, not only colour.

Why it is there: So that the ERP looks like the company. Employees cannot change it.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Look > Theme. Each card shows a small preview of that look.
2. Press “Use this look” on the one you want, then set Light, Dark or Auto below it.

Good to know:

- The art looks (Warli, Paper Cut, Sand, Watercolor, Clay) are meant for everyday screens like Dashboard, Inbox and the forms; heavy number screens (Payroll run, big reports) read the same table either way.

Global Region For HR and Admin

Where: Core Setting > Location > Global Region

What it is: Groups of countries, for example Asia.

Why it is there: The location lists go from the world down to the city.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add or edit with the buttons shown.

Country For HR and Admin

Where: Core Setting > Location > Country

What it is: The countries the company works in.

Why it is there: A branch or an employee address is chosen from these lists.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add or edit with the buttons shown.

Business Region For HR and Admin

Where: Core Setting > Location > Business Region

What it is: Groups of states the way the company thinks of its areas.

Why it is there: Reports and targets by region.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add or edit with the buttons shown.

State For HR and Admin

Where: Core Setting > Location > State

What it is: The states and union territories of the country.

Why it is there: Statutory rules, professional tax and wage rules depend on the state.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and read or edit.

District For HR and Admin

Where: Core Setting > Location > District

What it is: The districts of each state.

Why it is there: For addresses.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and read or edit.

City For HR and Admin

Where: Core Setting > Location > City

What it is: The cities of each district. Each district headquarter is already there.

Why it is there: For addresses and for the city class of the travel policy.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add a city if yours is missing.

Zone For HR and Admin

Where: Core Setting > Location > Zone

What it is: The company's own areas, made of states.

Why it is there: Holidays and reports can be by zone.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add a zone and choose its states.

Roles For HR and Admin

Where: Core Setting > Automation > Roles

What it is: A role finds the right person from the subject employee's branch, division, department or from the whole company. Examples: HR Manager, Division Manager, Salary Verifier.

Why it is there: So that workflows say “the Division Manager” and the system finds the person.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Automation > Roles.
2. Open a role and choose who holds it, for which branch or division.

Workflow For HR and Admin

Where: Core Setting > Automation > Workflow

What it is: The steps of each approval. Steps are based on roles. The page also shows who would approve right now.

Why it is there: So that how things get approved is set by the company and can be changed without changing the software.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Automation > Workflow.
2. Open a workflow (for example WF-030 Manager change). Add, remove or change its steps. For each step choose who approves: the Initiator, the Reporting Manager, a Role (the person is found from the employee's branch, division and so on), or a Specific employee (you pick one person from the list).
3. A step can be in any place of the chain, for example Step 1 Reporting Manager, Step 2 Specific employee, Step 3 Role Division Manager.
4. Save. New requests use the new steps. Requests already running keep their old steps.

Good to know:

- If the chosen employee has left or is not working, or a role has nobody for that employee, the step goes to HR. The panel “Who would approve?” at the bottom of the page shows who holds each step right now.

Task automation For HR and Admin

Where: Core Setting > Automation > Task automation

What it is: Which events create tasks, and which workflow they use. With no workflow, the item keeps its own screen.

Why it is there: To connect an event with its approval flow.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Automation > Task automation.
2. Choose the workflow for an event, or turn it off.

Access rights For HR and Admin

Where: Core Setting > Automation > Access rights

What it is: For each role, which pages can be viewed, added to, edited, approved and exported.

Why it is there: So that people see and do only what their role allows.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Automation > Access rights.
2. Choose a role at the top and tick or untick the boxes.

Good to know:

- Admin always keeps full access. A manager sees only his own team.

Attendance policy For HR and Admin

Where: Core Setting > Time Office > Attendance policy

What it is: The one policy of the company for attendance: late rules, half day and absence.

Why it is there: So that attendance is decided the same way for everybody.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Time Office > Attendance policy and read or change the rules.
2. In the Back date part, set how many days back an employee can apply for leave (default 3), regularization, on duty (7) and short leave (3). 0 means only today and later. HR and Admin can still raise a request for an employee. The database also checks the leave limit: an employee cannot go beyond the loosest Leave days of the active policies of the company, and HR on behalf of an employee up to 30 days.
3. A day without an approved leave stays Absent. When the leave is approved later, the day shows EL, CL, SL or LWP. Absent days are not paid in payroll and are counted in KPI-004 (Unauthorized Absence).

Shifts For HR and Admin

Where: Core Setting > Time Office > Shifts

What it is: The shifts of the company: name, start and end time, break, grace minutes and branch. A night shift is one that ends the next day.

Why it is there: A person gets a shift in Time Office > Shift assignment, from this list.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Time Office > Shifts and press + Add.
2. Write the name, start time and end time. Tick Night shift if it ends the next day.
3. Enter the break and the grace minutes, choose the branch (or all branches). Save.

Holiday bank For HR and Admin

Where: Core Setting > Time Office > Holiday bank

What it is: The list of holidays the company can choose from.

Why it is there: So that the holiday calendar is made from one list.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add or edit a holiday.

Holiday calendar For HR and Admin

Where: Core Setting > Time Office > Holiday calendar

What it is: The holidays of the year for each branch, zone or state.

Why it is there: A holiday is not counted as absent and no daily work is made on it.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and press + New calendar. Choose holidays from the bank and where they apply.

Leave types For HR and Admin

Where: Core Setting > Time Office > Leave types

What it is: Every kind of leave, with its yearly quota and rules.

Why it is there: Employees ask for leave from these types.

Who uses it: HR and Admin.

Step by step:

1. Open the tab, press + Leave type or Edit, and fill the code, the name, Pay (Paid, or Unpaid where the salary is cut), the quota and the rules.
2. Notice: in Notice before the leave press + Add a row. In each row choose the length of the leave and how many days before the person must apply (for example 1 day: 1 day before, 2 days: 3 days before, 3 days or more: 7 days before). A leave longer than the last row uses the last row; 0 means the same day. HR and Admin can apply for an employee without this notice. Who can take: choose Whole company (leave empty), or add groups from the list (Function, Department, Branch, Division, Sub-division, Designation, Career level or a Specific employee); a person in any added group can take it. Gender is a separate choice. The database checks who can take, the most days and the notice too, so they cannot be bypassed. Other rules: most days in one request, proof, off days between leave days, whether the balance is given from the first day or by labour law, probation, no limit (like LWP), balance given only by HR, and quota for the whole service.
3. Press Add or cut a balance to give or take days from an employee. Every change is listed below with the reason.

Encashment and carry forward For HR and Admin

Where: Core Setting > Time Office > Encashment and carry forward

What it is: Which leaves can be encashed or carried to the next year, and how much.

Why it is there: So that the end of the leave year is done by rule.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and set the rules for each leave type.

Leave and pay rules For HR and Admin

Where: Core Setting > Time Office > Leave and pay rules

What it is: How leave, unpaid leave and half days change the paid days.

Why it is there: So that the salary follows the same rules as attendance.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and read or change the rules.

Expense types For HR and Admin

Where: Core Setting > Expense > Expense types

What it is: The kinds of expense an employee can claim, each with a limit.

Why it is there: So that claims follow a limit.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add or change an expense type and its limit.

Grades and limits For HR and Admin

Where: Core Setting > Expense > Grades and limits

What it is: From the travel policy: for each grade, the daily allowance and the lodging limit.

Why it is there: So that a traveller gets what the policy gives to his grade.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and change the limits for a grade.

City classes For HR and Admin

Where: Core Setting > Expense > City classes

What it is: The class of a city decides the lodging limit and the daily allowance.

Why it is there: Big cities cost more than small ones.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and give each city its class.

Rates and rules For HR and Admin

Where: Core Setting > Expense > Rates and rules

What it is: Rates and rules of the travel policy. A change applies to the trips made after it.

Why it is there: To keep the policy in one place.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and edit a rate.

Biometric sources For HR and Admin

Where: Core Setting > Integration > Biometric sources

What it is: Attendance can reach the ERP in four ways: from a machine, from an API, from a punch log file or by hand. This page shows each source.

Why it is there: Attendance is imported only here, never from the Cockpit.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Integration > Biometric sources and read the status of each source.

Devices For HR and Admin

Where: Core Setting > Integration > Devices

What it is: The machines. A device appears by itself with its first punch. A warning shows when a machine stops sending data.

Why it is there: To know which machine belongs to which branch.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and give each device a name and a branch.

Employee IDs For HR and Admin

Where: Core Setting > Integration > Employee IDs

What it is: A machine knows an employee by its own ID. Write it here next to the employee.

Why it is there: So that a punch reaches the right person.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and enter the machine ID for each employee.

Good to know:

- A punch whose ID matches no employee is shown as a warning in the Inbox.

API guide For HR and Admin

Where: Core Setting > Integration > API guide

What it is: The one door for attendance from outside, with the address and the format to send punches.

Why it is there: For the person who connects a machine or software.

Who uses it: HR and Admin.

Step by step:

1. Give this page to the person who sets up the machine software.

Punch log and import For HR and Admin

Where: Core Setting > Integration > Punch log and import

What it is: Import a punch log file with the columns Emp Code, Date Time, Device and Direction. The log of punches is kept here.

Why it is there: For machines that cannot send data by themselves.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and press Import a punch log. Choose the file.
2. Read the result. Fix the rows that were refused.

Notification events For HR and Admin

Where: Core Setting > Notifications > Notification events

What it is: Which events send a notice, and to whom. Work and task notices go to the web app and to the phone app as push. Email, SMS and WhatsApp are used only for the first sign-in, a password reset and an OTP.

Why it is there: So that people are told what they must know, and not more.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Notifications > Notification events and choose who gets which kind.

System messages For HR and Admin

Where: Core Setting > Notifications > System messages

What it is: The texts of the email, SMS and WhatsApp messages that the system sends.

Why it is there: So that the words match the company.

Who uses it: HR and Admin.

Step by step:

1. Open the tab, edit a message and save.

Reminders and escalation For HR and Admin

Where: Core Setting > Notifications > Reminders and escalation

What it is: When a pending item in someone's Inbox is reminded, and when it is sent to his manager and then to HR.

Why it is there: So that work does not wait without anyone noticing.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and set the number of days for each step.

Delivery log For HR and Admin

Where: Core Setting > Notifications > Delivery log

What it is: The list of what was sent and what would go to the phones as push.

Why it is there: To check that a message was sent.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and read the log.

Support setup For HR and Admin

Where: Core Setting > Support > Support setup

What it is: The types of ticket for HR, IT, Admin and Grievance. Each type has levels. A level is a role and a time limit (TAT). The people at a level come from the Roles master.

Why it is there: So that every ticket reaches the right person and is escalated when late.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Support > Support setup.
2. Choose a type, then add levels with a role and a time limit for each.

SLA master For HR and Admin

Where: Core Setting > Rules and numbering > SLA master

What it is: Every limit, grace, slab and target that the KPIs use is here, not in the software. Examples: late limit, retention days, days to fill a vacancy.

Why it is there: So that a rule can be changed by the company, with a date, without changing the software.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Rules and numbering > SLA master.
2. Open a rule, enter the new value and the date it applies from.

Code series For HR and Admin

Where: Core Setting > Rules and numbering > Code series

What it is: How the code of a new employee is made: letters and numbers, for example E019. The same tab sets the codes of Function, Department, Branch, Division, Sub-division and Designation (FN001, DP001, BR001, DV001, SD001, DG001): press Edit on its card to change the prefix and the digits.

Why it is there: So that every employee has a unique, orderly code.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and press Edit to change the letters or the starting number.

Month close For HR and Admin

Where: Core Setting > Rules and numbering > Month close

What it is: The window after the month end in which late entries are still allowed, and how long HR can extend it.

Why it is there: So that a month closes on a known date and the KPI scores are locked.

Who uses it: HR and Admin.

Step by step:

1. Open the tab, set the days and press Save.

Exit interview For HR and Admin

Where: Core Setting > Templates > Exit interview

What it is: The questions of the exit interview that HR and the manager ask a person who is leaving.

Why it is there: So that every leaver is asked the same questions.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Templates > Exit interview and add or change questions.
2. In Who it is for, add the groups the template is for (Function, Department, Branch, Division, Sub-division, Designation, Career level or a Specific employee), or tick This is the default template. A person in any added group gets this template; everyone else gets the default.

Greetings For HR and Admin

Where: Core Setting > Templates > Greetings

What it is: The greetings (birthday, work anniversary) that employees can choose from.

Why it is there: So that wishes are sent in the company's style.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and add or change a greeting.

Induction template For HR and Admin

Where: Core Setting > Templates > Induction template

What it is: One template for everybody: the items of the induction of a new joiner, who does each one, in how many days and what proof is needed.

Why it is there: So that every joiner gets the same welcome. The items go as tasks to the right people.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Templates > Induction template.
2. Add or change an item: name, owner (reporting manager, floor manager, HR or a fixed person), days after joining and the proof.

Daily work template For HR and Admin

Where: Core Setting > Templates > Daily work template

What it is: Work that must be done every working day. Each day the system puts it on the To Do list of every employee of the chosen designations. It is not made on a weekly off, a holiday or a leave day.

Why it is there: This is the mandatory to do list. How well it is done counts in KPI-006 “Daily Mandatory Work Completion”.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Templates > Daily work template and press + Daily work.
2. Write the work. Hindi and details are optional.
3. Tick the designations it is for. None ticked means everyone.
4. Save. From the next working day it appears in the employees' To Do list (My Assignment > To Do list).

Good to know:

- To stop a work, press Inactivate on it.

Alteration setup For HR and Admin

Where: Core Setting > Templates > Alteration setup

What it is: Shift minutes, productivity and the types of alteration job.

Why it is there: So that alteration jobs are planned and measured the same way.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and set the job types and the minutes.

Stock audit setup For HR and Admin

Where: Core Setting > Templates > Stock audit setup

What it is: The tolerance of a stock difference and what is shown in a stock audit.

Why it is there: So that a stock audit gives the same result for everybody.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and set the tolerance.

Licence For HR and Admin

Where: Core Setting > Account and audit > Licence

What it is: The plan of the company: modules given, number of employees allowed, hard limit and the valid-till date.

Why it is there: So that the company knows what it has taken and when it ends.

Who uses it: HR and Admin.

Step by step:

1. Open Core Setting > Account and audit > Licence and read it.

Good to know:

- A module that the company has not taken does not show in the left menu.

Accounts For HR and Admin

Where: Core Setting > Account and audit > Accounts

What it is: The sign-in accounts: active, locked, never signed in and closed. HR can unlock an account and reset a password.

Why it is there: To help a person who cannot sign in.

Who uses it: HR and Admin.

Step by step:

1. Open the tab, find the person and press Unlock or Reset.

Audit log For HR and Admin

Where: Core Setting > Account and audit > Audit log

What it is: The list of every important change: when, who, in which module, what and the change. Nothing in it can be edited or deleted.

Why it is there: So that anything that was changed can be traced.

Who uses it: HR and Admin.

Step by step:

1. Open the tab and read the log. Search for a name or a record number.

10. My Assignment

Your work list and the work you give to others: to do, tasks, daily challenge, decisions and meetings.

To Do list

Where: My Assignment > To Do list

What it is: Your list of work for the day: the daily mandatory work made for you by the system, and the tasks others gave you. Each item can be moved from To Do to In Progress to Done.

Why it is there: So that you know every morning what must be done, and the manager can see how much was done.

Who uses it: Every employee.

Step by step:

1. Open My Assignment > To Do list.
2. Open an item, write what you did, and mark it Done.

Good to know:

- The daily mandatory work is set by HR in Core Setting > Templates > Daily work template. It is not made on a weekly off, a holiday or a leave day.
- How well it is done counts in KPI-006.

Task assignment

Where: My Assignment > Task assignment

What it is: One employee gives work to another with a due date and a priority. When the receiver finishes, the giver confirms.

Why it is there: So that work given in words is written down, followed and closed.

Who uses it: Any employee who has someone to give work to.

Step by step:

1. Open My Assignment > Task assignment and press Assign a task.
2. Choose the person, write the task and details, set the due date and priority. Press Assign.
3. When the receiver marks it done, you get an Inbox item “Confirm the task”. Confirm to close it.

Today's Challenge

Where: My Assignment > Today's Challenge

What it is: A challenge for the day (for example a count to reach by a time of the day) given to a team by a manager. The manager enters the count and sees the current stage.

Why it is there: To keep the team on pace through the day, not only at the end.

Who uses it: The manager who owns the challenge and the team.

Step by step:

1. Open My Assignment > Today's Challenge.
2. Enter the count of each person at the time shown.

Good to know:

- If the count is not entered, an item “count not entered” appears in the Inbox of the manager.

Refilling

Where: My Assignment > Refilling

What it is: A daily form for the person who has the refilling KPI: product range, quantity needed and quantity refilled, with a report.

Why it is there: It gives the figures for KPI-034 Refilling Completion %.

Who uses it: The person who has this KPI.

Step by step:

1. Open My Assignment > Refilling and fill the form every day.

Decisions

Where: My Assignment > Decisions

What it is: A record of a decision taken in a meeting: who owns it, when it is due, who approves, and who must acknowledge. An approved decision becomes an action to complete.

Why it is there: So that what was decided is not forgotten.

Who uses it: The owner, the approvers and the people who attended the meeting.

Step by step:

1. Open My Assignment > Decisions and make a decision with its owner and due date.
2. Send it for approval. After approval the owner completes the action.
3. The people of the meeting get “Acknowledge decision” in the Inbox.

Meetings

Where: My Assignment > Meetings

What it is: Meetings with their attendees and the decisions taken in them.

Why it is there: To keep the decisions with the meeting they came from.

Who uses it: The person who calls the meeting and the attendees.

Step by step:

1. Open My Assignment > Meetings, make a meeting and add the attendees.
2. Add the decisions from the Decisions tab.

Log history

Where: My Assignment > Log history

What it is: The history of the work you did and gave.

Why it is there: To look back at who did what and when.

Who uses it: Every employee.

Step by step:

1. Open My Assignment > Log history and read the list.

Electrical maintenance

Where: My Assignment > Electrical maintenance

What it is: A record of the electrical check of a store area, what was put right, the vendor and the work done, with a photo.

Why it is there: So that electrical faults are fixed and shown with proof.

Who uses it: The person who has the KPI, managers and HR.

Step by step:

1. Open My Assignment > Electrical maintenance.
2. Add the date, the store and area, what you checked and what you put right, with a photo.
3. The manager sees it in the list and gives the status.

System maintenance

Where: My Assignment > System maintenance

What it is: The service record of systems (such as computers or machines): when it was last done, when it is due and who did it.

Why it is there: So that systems are serviced on time.

Who uses it: The person who has the KPI and HR.

Step by step:

1. Open My Assignment > System maintenance.
2. Find the system. The status shows due or overdue.
3. After servicing, record it with the date. The next due date moves ahead.

Barcode/Tag inspection

Where: My Assignment > Barcode/Tag inspection

What it is: A weekly check of tags and barcodes in a section: how many were checked and how many were missing, wrong, unreadable or double, and how many were put right.

Why it is there: So that stock tags stay correct.

Who uses it: The person who has the KPI and managers.

Step by step:

1. Open My Assignment > Barcode/Tag inspection.
2. Add the week, the section and the counts of checked, missing, wrong, unreadable and double.
3. Write how many you put right and how many are left.

Indexing and VM photos

Where: My Assignment > Indexing and VM photos

What it is: Photos of indexing and visual merchandising that prove the work, with the KPI, the section and the date.

Why it is there: So that the work is shown, not only told.

Who uses it: The person who has the KPI and managers.

Step by step:

1. Open My Assignment > Indexing and VM photos.
2. Add the photo, choose the KPI and the section.
3. The manager checks the photo and gives the status.

CCTV monitoring

Where: My Assignment > CCTV monitoring

What it is: Feedback from watching CCTV, with the category, the division or the person, the remark and the proof.

Why it is there: So that what the camera shows reaches the right KPI and person.

Who uses it: The person who watches the CCTV, managers and HR.

Step by step:

1. Open My Assignment > CCTV monitoring.
2. Add a note: the date, the category and who or which division it is about, with a remark and a proof.
3. Each category goes to a KPI, shown in the table.

Alteration jobs

Where: My Assignment > Alteration jobs

What it is: Alteration jobs of customers: the work, the customer, the salesman, the tailor and the promised date, with the status.

Why it is there: So that the promise to the customer is kept.

Who uses it: Salesmen, tailors and managers.

Step by step:

1. Open My Assignment > Alteration jobs.
2. The salesman makes the job with the customer and the promised date.
3. The tailor does the work and fills the day-end entry. The status moves to done.

Stock audit

Where: My Assignment > Stock audit

What it is: A count of stock by a person who is given the items, and the correct count after the check.

Why it is there: So that stock differences are found early.

Who uses it: The person who counts and the manager who gives the audit.

Step by step:

1. The manager makes the audit for a division and chooses the person and the items.
2. The person gets a task in the Inbox, opens it and enters the count of each item.
3. The system shows how many were correct. The status closes after the due date.

Decision actions

Where: My Assignment > Decision actions

What it is: The actions that came out of a decision taken in a meeting, with who must do what.

Why it is there: So that a decision turns into work.

Who uses it: Every employee.

Step by step:

1. Open My Assignment > Decision actions.
2. Each row shows the decision, the meeting, the status and what to do.
3. Do your part and mark it done.

11. Support Hub

Raise a ticket for HR, IT or Admin, follow it, and find answers. A ticket moves through levels and goes up by itself when it is late.

Raise Ticket

Where: Support Hub > Raise Ticket (or the + Raise ticket button at the top of any Support Hub tab)

What it is: The form to ask for help. You choose what it is about (HR, IT, Admin or Grievance) and the type, then write the subject.

Why it is there: So that a request goes to the right team, with a time limit, and does not get lost.

Who uses it: Every employee. A manager or HR can raise on behalf of another person.

Step by step:

1. Press + Raise ticket (or open the Raise Ticket tab).
2. Choose “What is it about” and the Type. Some helpful answers may appear. Read them first.
3. Choose the priority, write the subject and details, and press Raise ticket.
4. Follow it in My Tickets or Track Request.

Good to know:

- For a grievance you can raise anonymously.

My Tickets

Where: Support Hub > My Tickets

What it is: All the tickets you raised, with their status and the time left.

Why it is there: To follow your tickets in one list.

Who uses it: Every employee.

Step by step:

1. Open Support Hub > My Tickets and press Open on a ticket.
2. Reply when the ticket is “Waiting for requester”, and confirm when it is resolved.

Track Request

Where: Support Hub > Track Request

What it is: Type a ticket number (for example TKT-0001) to see at which level it is, with whom, and the time taken.

Why it is there: So that you can see the whole path of a ticket.

Who uses it: Every employee.

Step by step:

1. Open Support Hub > Track Request, type the number and press Track.

HR Support For HR and Admin

Where: Support Hub > HR Support (people of the HR desk)

What it is: The tickets of the HR desk: For me, All open, and Resolved and closed.

Why it is there: So that the people of the desk answer in time.

Who uses it: The people who hold a level of the HR desk, and HR.

Step by step:

1. Open Support Hub > HR Support. Start with “For me”.
2. Open a ticket, answer it, and press Resolve. If you cannot, it goes to the next level.

IT Support

Where: Support Hub > IT Support (people of the IT desk)

What it is: The tickets of the IT desk, in the same three lists.

Why it is there: So that IT problems are solved in time.

Who uses it: The people of the IT desk.

Step by step:

1. Open Support Hub > IT Support and work from “For me”.

Admin Support

Where: Support Hub > Admin Support (people of the Admin desk)

What it is: The tickets of the Admin desk, in the same three lists.

Why it is there: So that office and facility requests are solved in time.

Who uses it: The people of the Admin desk.

Step by step:

1. Open Support Hub > Admin Support and work from “For me”.

Grievance

Where: Support Hub > Grievance (only for the people who hold it)

What it is: The serious complaints of employees, which may be anonymous. Only the people named for it can see them.

Why it is there: So that an employee can complain safely.

Who uses it: The people who hold the grievance desk.

Step by step:

1. Open Support Hub > Grievance and open a ticket to read it and answer.

Knowledge Base

Where: Support Hub > Knowledge Base

What it is: Ready answers to common questions, written by the support teams. You can search and mark an answer helpful or not.

Why it is there: So that people solve small problems themselves and fewer tickets are needed.

Who uses it: Everyone reads. The support teams write.

Step by step:

1. Open Support Hub > Knowledge Base, type a word and read the answers.

Feedback and Rating

Where: Support Hub > Feedback & Rating

What it is: The rating that people give for a resolved ticket and the summary of the ratings of each desk.

Why it is there: To see how good the support is.

Who uses it: The person who raised the ticket rates. HR reads the summary.

Step by step:

1. After a ticket is resolved, open it and give the rating.

12. Leave

Apply for leave, approve leave, encash leave and see the holidays.

My leaves

Where: Leave > My leaves

What it is: Your leave balance of each type and the leaves you asked for, with their status.

Why it is there: So that you ask for leave and follow it without calling anyone.

Who uses it: Every employee.

Step by step:

1. Open Leave > My leaves and press Apply leave.
2. Choose the leave type, the dates (or half day) and the reason. Send.
3. Your reporting manager approves it. You can cancel it while it is pending.

Approvals

Where: Leave > Approvals

What it is: The leave and attendance requests of your team waiting for you.

Why it is there: So that a request is answered quickly.

Who uses it: The reporting manager and HR.

Step by step:

1. Open Leave > Approvals (or the Inbox item “Approve a leave or attendance request”).
2. Read the request and press Approve or Reject.

Encash leave

Where: Leave > Encash leave

What it is: Asking to be paid for unused leave, within the rules of the company.

Why it is there: So that unused leave can be turned into money by rule.

Who uses it: The employee asks. The reporting manager and HR approve (workflow WF-027).

Step by step:

1. Open Leave > Encash leave and press the button to ask. Enter the days.
2. After approval, the amount is paid with a salary.

Good to know:

- Which leaves can be encashed is set in Core Setting > Time Office > Encashment and carry forward.

Short leave

Where: Leave > Short leave

What it is: A leave of a few hours in a day.

Why it is there: So that a short absence is recorded properly and not counted as a full day.

Who uses it: The employee asks. The reporting manager approves.

Step by step:

1. Open Leave > Short leave, choose the date and the hours, and send.

Holidays

Where: Leave > Holidays

What it is: The holidays of your branch for the year.

Why it is there: So that you know the days off.

Who uses it: Everyone.

Step by step:

1. Open Leave > Holidays and read the list.

Good to know:

- HR sets the holidays in Core Setting > Time Office > Holiday calendar.

13. Attendance

Your own attendance and the attendance of your team today.

My attendance

Where: Attendance > My attendance

What it is: A calendar of your month: present, late, absent, leave, weekly off and holiday, with your in and out times.

Why it is there: So that you can check your attendance and ask for a correction in time.

Who uses it: Every employee.

Step by step:

1. Open Attendance > My attendance.
2. If a day is wrong, open Attendance requests and raise a regularization for that day.

Team today

Where: Attendance > Team today

What it is: Who of your team is present, late, absent or on leave today.

Why it is there: So that a manager knows the strength of the day.

Who uses it: Managers and HR.

Step by step:

1. Open Attendance > Team today and read the list.

14. Attendance requests

Corrections of attendance (regularization) and on-duty requests.

My requests

Where: Attendance requests > My requests

What it is: The requests you raised to correct a day (regularization) or to mark a day as on duty, with their status.

Why it is there: So that a missed or wrong punch is corrected with the manager's approval.

Who uses it: Every employee.

Step by step:

1. Open Attendance requests > My requests and press the button to raise a request.
2. Choose the day, the correct in and out times and the reason. Send.
3. Your manager approves, and then HR if needed. You can cancel while it is pending.

Team

Where: Attendance requests > Team

What it is: The requests of your team waiting for you.

Why it is there: So that corrections are approved quickly.

Who uses it: Managers.

Step by step:

1. Open Attendance requests > Team, read a request and press Approve or Reject.

HR For HR and Admin

Where: Attendance requests > HR

What it is: The requests that the manager has approved and that wait for HR, and the corrections that HR must make.

Why it is there: So that a correction is final only after HR checks it.

Who uses it: HR.

Step by step:

1. Open Attendance requests > HR, read a request and approve it or make the correction.

15. My Profile

Your own details: personal, job, bank and statutory details, and your documents.

My Profile: overview

Where: My Profile

What it is: Your own details: personal, job, bank and statutory details, and your documents.

Why it is there: So that you keep your details correct. A change you ask for goes to HR for approval.

Who uses it: Every employee.

Step by step:

1. Open My Profile from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: details, address, documents.

16. My Requests

Everything you asked for in one place: leave, attendance, advance, asset, letters and tickets, with their status.

My Requests: overview

Where: My Requests

What it is: Everything you asked for in one place: leave, attendance, advance, asset, letters and tickets, with their status.

Why it is there: So that you do not search in each module to know where your request is.

Who uses it: Every employee.

Step by step:

1. Open My Requests from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: one list of all your requests.

17. Team

The people who report to you, directly and indirectly, with their status.

Team: overview

Where: Team

What it is: The people who report to you, directly and indirectly, with their status.

Why it is there: So that a manager sees his team in one place.

Who uses it: Managers.

Step by step:

1. Open Team from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: the team list.

18. Cockpit

The control room of HR. Search for any employee and see the full picture of that person, take quick actions, import daily attendance with status, and see requests and insights.

Cockpit: overview

Where: Cockpit

What it is: The control room of HR. Search for any employee and see the full picture of that person, take quick actions, import daily attendance with status, and see requests and insights.

Why it is there: So that HR does not go to ten modules to answer one question about a person.

Who uses it: HR and Admin.

Step by step:

1. Open Cockpit. The first tab is Search.
2. To find a person: type a name, code, designation, email or phone, or use the filters. Press Open on the person to see the full picture.
3. To go to a module: under “Go to” press the module card (for example Payroll). The list of its sections opens right below the card, here in the Cockpit. Press a section to open that screen, or “Open Payroll ›” for the module itself. Press Close to hide the list.
4. A card of a page that has no sections (for example Employees or Exits) opens that page at once.

Search

Where: Cockpit > Search

What it is: Find any employee and see the full picture of that person, then act from the same screen.

Why it is there: So that HR answers a question about a person in one place.

Who uses it: HR and Admin.

Step by step:

1. Open Cockpit. Type a name, code, designation, email or phone, or use the filters.
2. Press Open on the person to see attendance, leave, salary, KPIs and documents together.
3. Under “Go to” press a module card to open the list of its sections right here.

Actions

Where: Cockpit > Actions

What it is: Quick actions for HR on one or many employees, without going to each module.

Why it is there: To save the clicks of the daily HR work.

Who uses it: HR and Admin.

Step by step:

1. Open Cockpit > Actions.
2. Choose the action, then choose the employees (search or use the filters).
3. Check the summary and confirm. The change is saved in the audit trail.

Imports

Where: Cockpit > Imports

What it is: Upload a file of daily attendance with status, check it, and see the history of earlier uploads.

Why it is there: So that attendance from a machine or a sheet reaches the system without typing each row.

Who uses it: HR and Admin.

Step by step:

1. Open Cockpit > Imports. Press Download template and fill it.
2. Press Choose file and pick your file, then press Check file. Errors are shown row by row.
3. Fix the errors in the file and check again. When it is clean, import it. The table below shows when, which file, who and how many rows.
4. Employee bulk upload is on the same page. Press Download template, and Download master codes to see every code. The columns are: Employee Code, Name, Mobile, Email, DOB, Gender, DOJ, Function Code, Department Code, Branch Code, Division Code, Sub-division Code, Designation Code, Reporting Manager Code, Functional Manager Code. There is no Career Level: HR sets it later, with the salary structure. Leave Employee Code empty to get the next code; if you write one it must follow the Code series (numbers only, or letters and numbers like E001) and be new. The six organization codes must belong together. A manager can be a person already in the system or a row of the same file (with an Employee Code). Dates are DD/MM/YYYY. There is no CTC and no Career Level: after the upload (and after + Add employee too) HR gets an Inbox task, “Set the career level and salary structure”, for every employee who has none yet.

Requests

Where: Cockpit > Requests

What it is: All the change requests that employees sent for their own details, with what changes and the proof.

Why it is there: So that HR decides every change in one list.

Who uses it: HR and Admin.

Step by step:

1. Open Cockpit > Requests.
2. Open a row to see the old value, the new value and the proof document.
3. Approve, or reject with a reason. The employee gets the answer in the Inbox.

Insights

Where: Cockpit > Insights

What it is: What is pending and where it is stuck: the pending board, history, HR analytics and reports.

Why it is there: So that HR sees the delay and follows up on the right person.

Who uses it: HR and Admin.

Step by step:

1. Open Cockpit > Insights.
2. Choose Pending board for what is open, with the stage, who it is with and the days.
3. Choose History, HR analytics or Reports for the past and the totals.

19. Analytics

Charts and figures of the company: people, attendance, payroll and performance.

Analytics: overview

Where: Analytics

What it is: Charts and figures of the company: people, attendance, payroll and performance.

Why it is there: To see the company at a glance.

Who uses it: HR, Admin and managers.

Step by step:

1. Open Analytics from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: charts and figures.

Sales analysis (Performance)

Where: Analytics > Sales analysis (Performance)

What it is: Ten sales dashboards in Analytics > Performance > Sales analysis, made from the daily sales files (Cockpit > Imports: employee and division sales, bills, quantity and returns) and the sales targets. Division reports: sale against target (with the pace of the running month), month by month with growth, comparison with last month and last year (same days), ranking and share of the total, and bills, average bill value, items per bill and returns. Employee reports: sale against personal target (best ten and weakest ten), achievement bands, employee against the average of his division, six-month trend of one employee, and a check that the employee targets add up to the division target.

Why it is there: So that sales can be compared, explained and followed up, and not only imported.

Who uses it: HR and Admin see everything. A manager sees only the employee reports, and only of his own team.

Step by step:

1. Open Analytics > Performance and press Sales analysis.
2. Choose the month (the running month shows as “till today”), the branch or division, and, for the trend card, an employee.
3. Every card can be shown as a table or a chart, opened in full, drilled down to the employees (click a row) and exported to CSV.
4. Upload the daily files every day in Cockpit > Imports (till-date sale and quantity, till-date bills, division returns). The app keeps every day, so the day-wise history and the same-day comparisons are there. To compare with last year, upload last year’s files the same way.

Good to know:

- Colours: green when the achievement is at or above the first limit (100%), yellow at or above the second (80%), red below. In the running month the colour compares with the days gone (the pace). The limits are the same as the Dashboard cards (the SLA “Target colours on the Dashboard”).
- Division sales have no branch, so the branch filter does not change the division reports. A dash means there is no figure to compare with.

20. Engagement

The notice board, polls, letters and orders, surveys and recognition: how the company talks to its people.

Engagement: overview

Where: Engagement

What it is: The notice board, polls, letters and orders, surveys and recognition: how the company talks to its people.

Why it is there: So that company news and letters reach everybody and their reply is recorded.

Who uses it: Everyone reads. HR writes.

Step by step:

1. Open Engagement from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Notice board, Polls, Letters and orders, Surveys and recognition.

Notice board

Where: Engagement > Notice board

What it is: Notices of the company for everyone, with a record of who has read each.

Why it is there: So that important news reaches everybody and you can prove it.

Who uses it: Everyone reads. HR and Admin write.

Step by step:

1. To read: open Engagement > Notice board and press “I have read this”.
2. To write (HR): press + New notice, write it, choose who gets it and publish.
3. Press Who has read to see the list, or Withdraw to take a notice back.

Polls

Where: Engagement > Polls

What it is: A short question to employees, with the result shown after they vote.

Why it is there: To know the opinion of the team quickly.

Who uses it: Everyone votes. HR makes and closes polls.

Step by step:

1. To vote: open Engagement > Polls, choose your answer and press Submit my vote.
2. To make a poll (HR): press + New poll, write the question and the choices, and publish.
3. Press Close the poll when the time is over.

Letters and orders

Where: Engagement > Letters and orders

What it is: Official letters and office orders made from the letterhead, sent to employees, and confirmed by them.

Why it is there: So that every letter has a number, a date and a confirmation.

Who uses it: HR and Admin.

Step by step:

1. Open Engagement > Letters and orders. Press Letterhead once to set the company heading.
2. Press + New letter, choose the type and the employees, write it and save.
3. Press View or PDF to see or download it. Press Cancel to cancel it. The employee presses Confirm.

Surveys and recognition

Where: Engagement > Surveys and recognition

What it is: A page that leads to the surveys and the recognition of good work.

Why it is there: So that feedback and appreciation have a place in the same module.

Who uses it: Every employee.

Step by step:

1. Open Engagement > Surveys and recognition.
2. Press the card of the survey or the recognition to open it.

21. My Asset

The assets given to you (phone, laptop, uniform) and your requests for an asset.

My Asset: overview

Where: My Asset

What it is: The assets given to you (phone, laptop, uniform) and your requests for an asset.

Why it is there: So that you confirm what you received and ask for what you need.

Who uses it: Every employee.

Step by step:

1. Open My Asset from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: My assets, My requests.

My assets

Where: My Asset > My assets

What it is: The assets the company has given you. You confirm when you receive one and hand it back when you leave.

Why it is there: So that it is clear who holds what.

Who uses it: Every employee.

Step by step:

1. Open My Asset. The table shows the asset, type, issue date and your acknowledgement.
2. When HR gives you an asset, press Acknowledge to confirm that you received it.
3. Press Return when you hand it back. History shows the earlier assets.

My requests

Where: My Asset > My requests

What it is: The requests you made for a new asset, with the status.

Why it is there: So that you know whether your request is approved.

Who uses it: Every employee.

Step by step:

1. Press + Request an asset. Choose what you need, write the reason and the date.
2. Send it. It goes through the approval chain of the workflow.
3. See the status in My Asset > My requests.

22. Assets

Asset management for the company: inventory, assets given to employees, requests, handover at exit, types and maintenance.

Assets: overview

Where: Assets

What it is: Asset management for the company: inventory, assets given to employees, requests, handover at exit, types and maintenance.

Why it is there: So that every asset has an owner and comes back when the person leaves.

Who uses it: The Admin or HR who looks after assets.

Step by step:

1. Open Assets from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Inventory, Employee assets, Requests, Exit handover, Types, Maintenance.

Inventory

Where: Assets > Inventory

What it is: The list of all assets the company owns, with the tag, type, serial number, status and who holds it.

Why it is there: So that no asset is lost.

Who uses it: HR and Admin.

Step by step:

1. Open Assets > Inventory and press + Add to inventory.
2. Fill the name, the type and sub-type, the serial number and save. A tag number is made.
3. Press Issue on a row to give it to an employee. CSV downloads the list. History shows the past.

Employee assets

Where: Assets > Employee assets

What it is: What each employee holds and whether they acknowledged it.

Why it is there: So that HR knows who holds what.

Who uses it: HR and Admin.

Step by step:

1. Open Assets > Employee assets.
2. Press Transfer to move an asset to another employee.
3. Press Receive back when it returns.

Requests

Where: Assets > Requests

What it is: The asset requests of employees, with the reason and the date needed.

Why it is there: So that HR decides and gives the asset in one flow.

Who uses it: HR and Admin.

Step by step:

1. Open Assets > Requests.
2. Open a request and approve it or reject it with a reason.
3. For an approved one press Issue and choose the asset from the inventory.

Exit handover

Where: Assets > Exit handover

What it is: The assets that an employee who is leaving must give back, with the last working day.

Why it is there: So that nothing leaves with the person.

Who uses it: HR and Admin.

Step by step:

1. Open Assets > Exit handover.
2. Press Remind to send a reminder to the employee.
3. Press Receive back for each asset that returns. The settlement waits until all are back.

Types

Where: Assets > Types

What it is: The types and sub-types of assets.

Why it is there: So that assets are grouped in the same way.

Who uses it: HR and Admin.

Step by step:

1. Open Assets > Types.
2. Press + Type, then + Sub-type under it.
3. Save. They appear when you add an asset.

Maintenance

Where: Assets > Maintenance

What it is: How often each type of system must be serviced, and when the next service is due.

Why it is there: So that servicing is not forgotten.

Who uses it: HR and Admin.

Step by step:

1. Open Assets > Maintenance.
2. Press Edit and set the Interval for the type.
3. The list shows the last service, the next due date and the status.

23. Exits

Resignation, absconding and termination: the notice, the exit interview, the asset handover and the final settlement.

Exits: overview

Where: Exits

What it is: Resignation, absconding and termination: the notice, the exit interview, the asset handover and the final settlement.

Why it is there: So that a person leaves in an orderly way and nothing is left pending.

Who uses it: HR, the reporting manager and the employee.

Step by step:

1. Open Exits. To record a resignation press Mark resignation, choose the person and the reason. The reporting manager and HR approve.
2. A person who leaves without telling can also be recorded with the reason “absconding”.
3. The exit interview, the return of assets and the final settlement (Payroll > Final settlement) follow.

24. Expense

Expense advances, travel, reports and claims, their approval and the Accounts desk that pays.

Expense: overview

Where: Expense

What it is: Expense advances, travel, reports and claims, their approval and the Accounts desk that pays.

Why it is there: So that company money spent by people is asked for, shown with bills and paid by rule.

Who uses it: Employees raise. Managers and HR approve. Accounts pay.

Step by step:

1. Open Expense from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: My advances, Travel, Reports and claims, Approvals, Accounts desk, Register.

My advances

Where: Expense > My advances

What it is: An advance for company expenses that you settle later with bills.

Why it is there: So that you do not spend your own money for company work, and every rupee is accounted for.

Who uses it: Every employee.

Step by step:

1. Open Expense > My advances and press + Ask for an advance.
2. Write the amount, the purpose and the date by which you will settle. Send it.
3. After it is paid, add your bills in a claim report before the settle-by date.

Travel

Where: Expense > Travel

What it is: A travel request with the place, the reason, the dates and the estimate, as per the travel policy.

Why it is there: So that a trip is approved before it starts and costs are known.

Who uses it: Every employee.

Step by step:

1. Press Read the travel policy first. Then press + New travel request.
2. Write where, why, when and the estimate. Send it for approval.
3. After the trip, open it (Open) and give the trip report. Claim your bills in Reports and claims.

Reports and claims

Where: Expense > Reports and claims

What it is: A claim report with all your bills, to get back what you spent yourself or to settle an advance.

Why it is there: So that every claim is backed by a bill and approved.

Who uses it: Every employee.

Step by step:

1. Press + New claim report. Choose what it is for (a trip, an advance or other).
2. Add each bill with the amount and the photo of the bill. The total is worked out.
3. Send it. After approval the Accounts desk pays you.

Approvals

Where: Expense > Approvals

What it is: The advances, trips and claims that wait for your decision.

Why it is there: So that approvers decide in one list.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open Expense > Approvals.
2. Open an item and check the amount, the bills and the policy.
3. Approve, or reject with the reason.

Accounts desk

Where: Expense > Accounts desk

What it is: The place where the accounts team pays the approved advances and claims.

Why it is there: So that payment is made only after approval and is recorded.

Who uses it: The accounts team, HR and Admin.

Step by step:

1. Open Expense > Accounts desk. The number in brackets is the work waiting.
2. For an advance press Disburse after you give the money. For a claim press Pay.
3. Press Download to get the list for the bank.

Register

Where: Expense > Register

What it is: The full list of all advances and claims of the company with their status.

Why it is there: So that HR and accounts see everything and can audit.

Who uses it: HR and Admin.

Step by step:

1. Open Expense > Register.
2. Press Open on a row to see its bills and its history.
3. Press Download for the Excel file.

25. Business data

The figures of the business that feed the KPIs: sales, store, people, training, marketing and operations.

Business data: overview

Where: Business data

What it is: The figures of the business that feed the KPIs: sales, store, people, training, marketing and operations.

Why it is there: So that KPIs that depend on business figures have data to read.

Who uses it: HR, Admin and the people who enter the figures.

Step by step:

1. Open Business data from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Sales, Store, People & HR, Training, Marketing, Operations.

Sales

Where: Business data > Sales

What it is: Monthly sales figures by division. KPIs about sales are worked out from them.

Why it is there: So that the automatic KPIs are calculated from real figures.

Who uses it: HR and Admin.

Step by step:

1. Open Business data > Sales.
2. Press + Add and fill the month, the amount or count and the person or division.
3. To correct a wrong row press Delete and add it again. Only the data of the open month can change.

Store

Where: Business data > Store

What it is: Store records, such as stock figures and store checks, by person and month.

Why it is there: So that the automatic KPIs are calculated from real figures.

Who uses it: HR and Admin.

Step by step:

1. Open Business data > Store.
2. Press + Add and fill the month, the amount or count and the person or division.
3. To correct a wrong row press Delete and add it again. Only the data of the open month can change.

People & HR

Where: Business data > People & HR

What it is: Records about people, such as hiring and attrition numbers, by month.

Why it is there: So that the automatic KPIs are calculated from real figures.

Who uses it: HR and Admin.

Step by step:

1. Open Business data > People & HR.
2. Press + Add and fill the month, the amount or count and the person or division.
3. To correct a wrong row press Delete and add it again. Only the data of the open month can change.

Training

Where: Business data > Training

What it is: Training figures that the training KPIs are calculated from.

Why it is there: So that the automatic KPIs are calculated from real figures.

Who uses it: HR and Admin.

Step by step:

1. Open Business data > Training.
2. Press + Add and fill the month, the amount or count and the person or division.
3. To correct a wrong row press Delete and add it again. Only the data of the open month can change.

Marketing

Where: Business data > Marketing

What it is: Marketing figures entered by hand that the marketing KPIs use.

Why it is there: So that the automatic KPIs are calculated from real figures.

Who uses it: HR and Admin.

Step by step:

1. Open Business data > Marketing.
2. Press + Add and fill the month, the amount or count and the person or division.
3. To correct a wrong row press Delete and add it again. Only the data of the open month can change.

Operations

Where: Business data > Operations

What it is: Operations figures, such as store and service records, by month.

Why it is there: So that the automatic KPIs are calculated from real figures.

Who uses it: HR and Admin.

Step by step:

1. Open Business data > Operations.
2. Press + Add and fill the month, the amount or count and the person or division.
3. To correct a wrong row press Delete and add it again. Only the data of the open month can change.

26. CRM and ER

Customer feedback, complaints and the daily targets of the people who meet customers.

CRM and ER: overview

Where: CRM and ER

What it is: Customer feedback, complaints and the daily targets of the people who meet customers.

Why it is there: So that customer voice reaches the company and feeds KPIs.

Who uses it: HR, managers and the people who take feedback.

Step by step:

1. Open CRM and ER from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Feedback, Duplicate entries, Daily target, Setup, Complaints, Feedback form.

Feedback

Where: CRM and ER > Feedback

What it is: The feedback forms filled for customers, with the bill number, the division, who filled it and the score.

Why it is there: So that customer feedback is counted in the KPIs of the staff.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open CRM and ER > Feedback.
2. Use the filters for the date and the division. Each row shows the overall result and score.
3. Open a row to see the answers of the customer.

Duplicate entries

Where: CRM and ER > Duplicate entries

What it is: Bills for which feedback was filled more than once, so that nobody games the target.

Why it is there: So that only one feedback per bill counts.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open CRM and ER > Duplicate entries.
2. Each row shows the bill, who filled the repeat and the first entry.
3. Talk to the person. Only the first entry is counted.

Daily target

Where: CRM and ER > Daily target

What it is: How many feedback forms each employee must fill each day, and how many days the target was met.

Why it is there: So that the month score of the target is clear.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open CRM and ER > Daily target.
2. The table shows forms filled, applicable days, days at target, shortfall days and the month score.
3. The target number is set in Setup.

Setup

Where: CRM and ER > Setup

What it is: The questions of the feedback form and their answer types.

Why it is there: So that HR decides what the customer is asked.

Who uses it: HR and Admin.

Step by step:

1. Open CRM and ER > Setup and press + Add.
2. Write the question and choose the answer type.
3. Press Inactivate to stop a question. Old answers stay.

Complaints

Where: CRM and ER > Complaints

What it is: Complaints against a manager, registered and decided with a result.

Why it is there: So that a complaint is recorded, heard and closed properly.

Who uses it: HR and Admin.

Step by step:

1. Press + Register complaint. Choose the manager, write who complained and what happened.
2. Save. It shows in the list with the status.
3. Press Decide, choose the result and write the decision.

Feedback form

Where: CRM and ER > Feedback form

What it is: The form that staff fill with the customer after a bill, as set in Setup.

Why it is there: So that feedback is collected in the same way every time.

Who uses it: Every employee.

Step by step:

1. Open CRM and ER > Feedback form.
2. Write the bill number and the mobile number of the customer, then fill the answers.
3. Press Save. The same bill cannot be filled twice.

27. Stock ageing

Review of old stock: tasks given to reviewers, who reviews whose stock, and the weights and actions.

Stock ageing: overview

Where: Stock ageing

What it is: Review of old stock: tasks given to reviewers, who reviews whose stock, and the weights and actions.

Why it is there: So that stock that is not moving is reviewed and acted upon in time.

Who uses it: Reviewers, managers and HR.

Step by step:

1. Open Stock ageing from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Review tasks, Reviewer mapping, Weights and actions.

Review tasks

Where: Stock ageing > Review tasks

What it is: The month-end review of the stock of the employees who have the stock KPI, with the reviewer and the score.

Why it is there: So that a second person checks the stock every month.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open Stock ageing > Review tasks.
2. Each row shows the employee, the reviewer, the status and the review score.
3. The reviewer opens the task, checks the stock and gives the score.

Reviewer mapping

Where: Stock ageing > Reviewer mapping

What it is: Who reviews whose stock.

Why it is there: So that every employee has a reviewer.

Who uses it: HR and Admin.

Step by step:

1. Open Stock ageing > Reviewer mapping.
2. Press Choose reviewers.
3. Pick the reviewer of each employee and save.

Weights and actions

Where: Stock ageing > Weights and actions

What it is: The weight of each age group of stock in the score, and the action to take for old stock.

Why it is there: So that old stock counts more against the score.

Who uses it: HR and Admin.

Step by step:

1. Open Stock ageing > Weights and actions.
2. Change the weights and the actions.
3. Press Save.

28. Import center

Upload data from a file: for example sales figures, targets, feedback and employees.

Import center: overview

Where: Import center

What it is: Upload data from a file: for example sales figures, targets, feedback and employees.

Why it is there: So that a lot of data is entered at once, with a check of every row before it is saved.

Who uses it: HR, Admin.

Step by step:

1. Open Import center from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: the import templates.

29. Training

Training calendar and sessions, viva, on-the-job coaching, new employee induction, self training courses, assigning courses and progress.

Training: overview

Where: Training

What it is: Training calendar and sessions, viva, on-the-job coaching, new employee induction, self training courses, assigning courses and progress.

Why it is there: So that people are trained, tested and tracked.

Who uses it: Trainers, HR and employees.

Step by step:

1. Open Training from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Training calendar, Viva, Division participation, OJT coaching, Employee induction, Self Training, Courses, Assign courses, Learning progress, History, Setup, My trainings.

Training calendar

Where: Training > Training calendar

What it is: The calendar of mandatory trainings: the session, the date, the trainer, the audience and the test.

Why it is there: So that everybody knows when the training is and attends.

Who uses it: Every employee.

Step by step:

1. Open Training > Training calendar.
2. HR adds a session with the date, the trainer, the audience and the test.
3. After the session the trainer marks who attended and gives the test.

Viva

Where: Training > Viva

What it is: An oral test of an employee on what was taught, with the marks.

Why it is there: So that learning is checked by talking, not only by paper.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open Training > Viva.
2. Choose the employee and the topic.
3. Write the marks and the remark and save.

Division participation

Where: Training > Division participation

What it is: How many people of each division were assigned a training and how many attended, in percent.

Why it is there: So that a division that skips training is seen.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open Training > Division participation.
2. Read the table: assigned, attended and the percentage for each division.
3. Follow up with the division head where the percentage is low.

OJT coaching

Where: Training > OJT coaching

What it is: On-the-job coaching: a trainer teaches an employee at work against a checklist, with a due date.

Why it is there: So that skills are learned at the place of work.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open Training > OJT coaching and make an OJT: choose the employee, the trainer, the template and the due date.
2. The trainer ticks each point of the checklist as the employee shows it.
3. When the pass mark is reached the OJT is passed.

Employee induction

Where: Training > Employee induction

What it is: The plan for a new joiner: the items to be done by HR, the manager and the employee, and the progress.

Why it is there: So that a new person starts well.

Who uses it: Every employee.

Step by step:

1. Open Training > Employee induction. A plan is made when a person joins.
2. Each owner gets a task in the Inbox for their items and marks it done.
3. When all are done the employee confirms the induction.

Self Training

Where: Training > Self Training

What it is: Courses that you learn by yourself: watch the videos, read the lessons and take the tests.

Why it is there: So that you can learn at your own time.

Who uses it: Every employee.

Step by step:

1. Open Training > Self Training. Your courses are listed.
2. Open a course and finish its lessons in order.
3. Take the test. When you pass, the course is complete.

Courses

Where: Training > Courses

What it is: The library of courses: the category, the lessons, the skill, who it is assigned to and how many completed.

Why it is there: So that HR builds and keeps the courses in one place.

Who uses it: HR and Admin.

Step by step:

1. Open Training > Courses.
2. Make a course: the name, the category, the skill, then add the lessons and the test.
3. Publish it. Then assign it in Assign courses.

Assign courses

Where: Training > Assign courses

What it is: Give a course to people, and set the course that must be completed at each career level.

Why it is there: So that the right people learn the right course by a date.

Who uses it: HR and Admin.

Step by step:

1. Open Training > Assign courses.
2. Choose the course, who it goes to (people, division or level) and the last date. Say if it is mandatory.
3. Below, set the course that must be completed at each career level. The table shows who is still pending.

Learning progress

Where: Training > Learning progress

What it is: How far each person has gone in each course, the last date, the best test score and the status.

Why it is there: So that managers follow up the slow learners.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open Training > Learning progress.
2. Use the filters for the course or the person.
3. Remind the people who are behind the last date.

History

Where: Training > History

What it is: The training record of each person: assigned, attended, excused, absent and the average test percentage.

Why it is there: So that the whole picture of a person is in one row.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open Training > History.
2. Read the row of the person.
3. These numbers feed the training KPIs.

Setup

Where: Training > Setup

What it is: The templates of training: the type, the checklist points, the pass mark and the deadline days.

Why it is there: So that every OJT and viva uses the same standard.

Who uses it: HR and Admin.

Step by step:

1. Open Training > Setup.
2. Add a template with its checklist points and the pass mark.
3. Set the deadline days. Save.

My trainings

Where: Training > My trainings

What it is: Your own trainings: the sessions you must attend, your OJT and the courses you must finish.

Why it is there: So that you see all your learning in one place.

Who uses it: Every employee.

Step by step:

1. Open Training > My trainings.
2. See what is due and by when.
3. Open an item to attend, learn or give the test.

30. Marketing

Content items and their review, campaigns, post performance and the content calendar.

Marketing: overview

Where: Marketing

What it is: Content items and their review, campaigns, post performance and the content calendar.

Why it is there: So that marketing work is planned, reviewed and measured.

Who uses it: The marketing team, reviewers and HR.

Step by step:

1. Open Marketing from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Content items, Reviews, Campaigns, Post performance, Content calendar, Setup.

Marketing: Audience

Where: Marketing > Audience

What it is: The monthly followers and website visits of each channel, entered twice a month. The system works out KPI-277 (follower growth), KPI-267 (website traffic growth) from them, and KPI-269 (engagement rate) from the posts of Post performance.

Why it is there: So that these three KPIs are scored by the system from real figures, not by the manager's opinion.

Who uses it: The person who has KPI-277 or KPI-267 enters the figures. HR sees all and sets the channels in Marketing > Setup.

Step by step:

1. On the 1st of the month a task "Enter the opening" comes in your Inbox. Open it, or open Marketing > Audience.
2. Press Enter opening. The figure of each channel (Instagram, Facebook, WhatsApp channel, Website) is filled from last month's closing. Correct it if it is different and press Save.
3. On the last day of the month a task "Enter the closing" comes. Press Enter closing, fill the figure of each channel and press Save. The growth and the score are shown while you type. The task stays open until it is entered.
4. The score uses all channels together: (closing − opening) ÷ opening × 100, against the target growth (followers 5%, visits 10% a month). The growth of each channel is shown too.
5. To add a channel (for example YouTube) or stop one: HR goes to Marketing > Setup > Audience channels. The target percentages are in Core Settings > SLA.

Content items

Where: Marketing > Content items

What it is: Each design, video or post that is made: the campaign, the creator, the due date, the revisions and the status.

Why it is there: So that every piece of content is tracked from idea to posting.

Who uses it: Marketing staff, reviewers and HR.

Step by step:

1. Open Marketing > Content items and add an item: choose the campaign, the type and the due date.
2. The creator uploads the work and sends it for review.
3. When it is approved the item is ready to post. Use the filters (All, Draft and so on) to see the status.

Reviews

Where: Marketing > Reviews

What it is: The items that wait for your review, with the step, the reviewer and the time taken.

Why it is there: So that review does not delay the posting.

Who uses it: Reviewers and managers.

Step by step:

1. Open Marketing > Reviews.
2. Open an item, look at the work and approve it, or send it back with a note.
3. The time you take is counted in the review KPI.

Campaigns

Where: Marketing > Campaigns

What it is: A campaign groups the content for one occasion, with the platforms and the dates.

Why it is there: So that the team works to a plan.

Who uses it: Marketing managers and HR.

Step by step:

1. Open Marketing > Campaigns and press + New campaign.
2. Write the name, choose the platforms and the dates, and save.
3. Add the content items to it. The table shows the items and the status.

Post performance

Where: Marketing > Post performance

What it is: The numbers of each post: the platform, the planned and the posted date, the reach, the engagement and the views.

Why it is there: So that the result of a post is known. KPI-269 (engagement rate) is worked out from these figures.

Who uses it: The person who posts, and marketing managers.

Step by step:

1. Open Marketing > Post performance and press + Add post.
2. Choose the item and the platform and write the posted date.
3. After the measurement window, press Edit and enter the reach, the engagement and the views.

Content calendar

Where: Marketing > Content calendar

What it is: A calendar of when each post is planned and posted.

Why it is there: So that the team sees the gaps and the clashes.

Who uses it: Marketing staff and managers.

Step by step:

1. Open Marketing > Content calendar.
2. Move between the months to see the posts.
3. Open a post to see its item and status.

Setup

Where: Marketing > Setup

What it is: The platforms and the minimum numbers that a post must reach, and the audience channels for followers and visits.

Why it is there: So that the KPIs have a fair standard.

Who uses it: HR and Admin.

Step by step:

1. Open Marketing > Setup.
2. In the first table press + Add or Edit for a platform: the minimum engagement for an image and a video and the minimum views of a video.
3. In the second table add or stop the audience channels (see Marketing > Audience).

31. Library

Company documents (policies, manuals) that people must read and acknowledge.

Library: overview

Where: Library

What it is: Company documents (policies, manuals) that people must read and acknowledge.

Why it is there: So that everyone has read the current policy and it is on record.

Who uses it: HR publishes. Employees read and acknowledge.

Step by step:

1. Open Library from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: My library, Manage, Acknowledgements, Report.

My library

Where: Library > My library

What it is: The policies, SOPs and forms meant for you, with the version and whether you have acknowledged.

Why it is there: So that you read the latest rule and confirm that you did.

Who uses it: Every employee.

Step by step:

1. Open Library > My library.
2. Press Open on a document and read it.
3. Press “I have read this”. It is recorded with the date.

Manage

Where: Library > Manage

What it is: Make and keep the documents, their versions and who they are for.

Why it is there: So that only the live version is shown to people.

Who uses it: HR and Admin.

Step by step:

1. Open Library > Manage and press + New document.
2. Write the title, choose the category and the audience, add the file and publish.
3. To change it press New version. The old versions stay in the history.

Acknowledgements

Where: Library > Acknowledgements

What it is: Who has and who has not acknowledged each document.

Why it is there: So that HR can prove who read the rule.

Who uses it: HR and Admin.

Step by step:

1. Open Library > Acknowledgements.
2. Choose the document.
3. See the pending people and remind them.

Report

Where: Library > Report

What it is: A summary by category: documents, published versions, drafts, those that need acknowledgement and those due for review in 30 days.

Why it is there: So that no policy gets old.

Who uses it: HR and Admin.

Step by step:

1. Open Library > Report.
2. Read each category row.
3. Update the documents that are due for review.

32. PMS (performance)

Performance management: KPIs for every person, scoring, month close, counselling, career growth and performance cases.

PMS (performance): overview

Where: PMS (performance)

What it is: Performance management: KPIs for every person, scoring, month close, counselling, career growth and performance cases.

Why it is there: So that performance is measured by rule, every month, and decides growth and pay.

Who uses it: Employees see their own KPIs. Managers score and counsel. HR sets up.

Step by step:

1. Open PMS (performance) from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: Overview, KPI dashboard, KPI master, KPI assignment, Formula and mapping, Data sources, Evaluation, Audits, Checklists, Surveys and polls, KPI performance, Month close, Counselling, Career growth, Career and salary structure, Performance cases, Recognition, My career growth, My KPIs.

KPI dashboard

Where: PMS > KPI dashboard

What it is: The state of the month for all KPIs by category: how many are assigned, scored and pending.

Why it is there: So that HR sees at a glance what is left before the month can be closed.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > KPI dashboard.
2. Read each category row: KPIs, assigned to, scored and pending.
3. Go to the tab of the pending KPI (Evaluation, Data sources, Audits) and finish it.

KPI master

Where: PMS > KPI master

What it is: The list of all KPIs: the name, the category, the maximum score, the frequency, the method and to how many people each is assigned.

Why it is there: So that there is one list of what is measured and how.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > KPI master.
2. Use the search and the filters to find a KPI. The method is Auto, Manager Scoring, Team Average or an audit.
3. Open a KPI to see its rule. A KPI of a module that is switched off is not counted.

KPI assignment

Where: PMS > KPI assignment

What it is: The rules that decide who has which KPI: for the whole organization, a designation, a level, a function, a department, a division, a branch or a specific person.

Why it is there: So that a KPI reaches exactly the people it is meant for.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > KPI assignment and add a rule: choose the KPI, the scope and the value, and the from and until dates.
2. Save. The table shows how many employees the rule reaches.
3. To stop a rule, make it Inactive. If two rules give the same KPI, the narrower scope wins.

Good to know:

- KPI-277 (follower growth) and KPI-267 (website traffic growth) are given here. After that the person gets the opening and closing tasks of Marketing > Audience.

Formula & mapping

Where: PMS > Formula & mapping

What it is: For each KPI: the method of scoring, and whether the data it needs is ready.

Why it is there: So that no KPI is assigned without a source for its numbers.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > Formula & mapping.
2. Look at the “Source ready” column of each KPI.
3. Where it is not ready, set up the source in Data sources or enter the data in Business data.

Data sources

Where: PMS > Data sources

What it is: For each KPI: where its numbers come from (a module, a report or a manual entry), who owns it and how often it is updated.

Why it is there: So that every number has an owner.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > Data sources.
2. Press Setup on a KPI row and choose the source type, the source or report and the owner.
3. Save. The status shows if the source is ready.

Evaluation

Where: PMS > Evaluation

What it is: The manager’s rating of the KPIs that are scored by judgement, from 1 to 10, with a comment.

Why it is there: So that the manager rates each person for the month.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open PMS > Evaluation. Each row is one employee and one KPI.
2. Choose the rating from 1 to 10 and write a comment where needed.
3. Save. The score is the rating divided by 10 times the maximum score of the KPI. You cannot rate yourself.

Audits

Where: PMS > Audits

What it is: The KPIs that are scored by an auditor against a checklist, with the result and the score.

Why it is there: So that a score is based on a fixed checklist, not on opinion.

Who uses it: Auditors, managers and HR.

Step by step:

1. Open PMS > Audits.
2. Open the audit of an employee and tick each point of the checklist.
3. Save. The score is worked out from the ticks.

Checklists

Where: PMS > Checklists

What it is: The checklists that the audits use, with their versions and the KPIs that use them.

Why it is there: So that every audit uses the same questions.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > Checklists.
2. Make a checklist and add its points. Publish it.
3. Link it to the KPI in the lower table. A change makes a new version; old audits keep the old one.

Surveys & polls

Where: PMS > Surveys & polls

What it is: A survey of the team about a manager, with how many were invited, how many answered and the average.

Why it is there: So that the team's view counts in the manager's KPI.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open PMS > Surveys & polls.
2. HR starts the survey of the month. Each team member answers in the Inbox, without a name being shown.
3. The average is shown here and used in the KPI.

KPI performance

Where: PMS > KPI performance

What it is: The monthly score of each employee for the whole year, side by side.

Why it is there: So that a trend is easy to see.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open PMS > KPI performance.
2. Read the row of the employee from April to the current month.
3. Open a month to see the KPIs behind the score.

Month close

Where: PMS > Month close

What it is: The last step of the month: for each person it shows the KPIs assigned, those with a result, those pending, the computed score and the final score. Closing locks the month.

Why it is there: So that the final score of the month is fixed once and used for pay and review.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > Month close.
2. Check the “Pending” column. It must be zero, or you accept the pending as not counted.
3. Close the month. The follower and visit KPIs (Marketing > Audience) need their closing figure before this.

Counselling

Where: PMS > Counselling

What it is: A counselling started for an employee whose score is low, with the reasons, the manager and the due date.

Why it is there: So that a low score leads to help, not only a mark.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open PMS > Counselling.
2. Open a case, talk to the employee and write what was agreed.
3. Mark it done by the due date.

Career growth

Where: PMS > Career growth

What it is: The quarter-wise review of each employee's growth, with its status and the review.

Why it is there: So that growth is discussed regularly.

Who uses it: Managers, HR and Admin.

Step by step:

1. Open PMS > Career growth.
2. Find the employee and the quarter.
3. Open it, write the review and save.

Career & salary structure

Where: PMS > Career & salary structure

What it is: The levels of the company and what each level means.

Why it is there: So that every person knows the next step.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > Career & salary structure.
2. Read the level, the career stage and what it means.
3. HR edits the text when the structure changes.

Performance cases

Where: PMS > Performance cases

What it is: A case for an employee whose performance is a concern, moving through stages, with the score, the next due date and the documents.

Why it is there: So that every step is fair and written.

Who uses it: HR and Admin.

Step by step:

1. Open PMS > Performance cases and open a case.
2. Do the work of the stage and add the documents.
3. Move it to the next stage. A task for each due date comes in the Inbox.

Recognition

Where: PMS > Recognition

What it is: Appreciation given to an employee, with the type, the title, the points and who gave it.

Why it is there: So that good work is seen.

Who uses it: Every employee.

Step by step:

1. Open PMS > Recognition.
2. Press to give recognition, choose the person, the type and write the reason.
3. It shows in the list and in the person’s profile.

My career growth

Where: PMS > My career growth

What it is: Your own growth: your level, your stage and your reviews.

Why it is there: So that you know where you stand and what next.

Who uses it: Every employee.

Step by step:

1. Open PMS > My career growth.
2. Read your level and the reviews of each quarter.
3. Talk to your manager about the next step.

My KPIs

Where: PMS > My KPIs

What it is: Your own KPIs for the month: the method, the maximum score, the result and the score with the detail.

Why it is there: So that you know your score before the month closes.

Who uses it: Every employee.

Step by step:

1. Open PMS > My KPIs.
2. Read each KPI. “Pending” means the number or the rating is not in yet.
3. The Detail column shows how the score was worked out.

Career growth model: how it works

Where: PMS > My career growth

What it is: The career growth model moves a person up through 12 levels (L1 Foundation, L2 Skilled, L3 Experienced, L4 Advanced, L5 Proficient, L6 Senior, L7 Specialist, L8 Expert, L9 Senior Expert, L10 Master, L11 Senior Master, L12 Mentor / Role Model). The year has four quarters: Q1 (Apr to Jun), Q2 (Jul to Sep), Q3 (Oct to Dec) and Q4 (Jan to Mar). The score of a quarter is the average of the final KPI scores of its three months, each month counted at most 100. The latest quarter score puts the person in a category: 90 or more is Fast growth, 80 or more is Regular growth, 70 or more is Development required, 60 or more is Improvement required, and below 60 is Critical review.

Why it is there: So that every person knows how to grow: what score is needed, how many quarters, and what stops a promotion.

Who uses it: Every employee. HR and the managers decide the growth.

Step by step:

1. Open PMS > My career growth. You see your level, your quarter scores and your growth status.
2. Fast growth: when a quarter is 90 or more the stage is Observation. When two quarters in a row are 90 or more the stage is Validation, and an assessment is due.
3. Regular growth: when the last 4 quarters are all 80 or more, the person is eligible.
4. The assessment has a pass mark of 70 and no area may be below 50. The person must also have no warning letter, PIP letter or show cause notice in the last 180 days, and no open performance case.
5. When the growth is approved (HR Manager, then Division Manager), the person moves to the next level and the new salary comes from the salary structure. After L12 the next step is a designation promotion.

Good to know:

- Your first quarter score appears only after the three months of that quarter are closed.

33. Reports

All reports of the ERP in one place, for the modules you may see. Each can be downloaded.

Reports: overview

Where: Reports

What it is: All reports of the ERP in one place, for the modules you may see. Each can be downloaded.

Why it is there: So that figures needed outside the ERP can be taken out easily.

Who uses it: HR, Admin and managers.

Step by step:

1. Open Reports from the left menu.
2. The tabs at the top (or the sections under it in the left menu) are: the report list.

34. Location requests

A request to mark attendance from outside the branch, for example on a client or field visit, for given dates.

Location requests: overview

Where: Location requests

What it is: A request to mark attendance from outside the branch, for example on a client or field visit, for given dates.

Why it is there: So that field work is allowed on record and not by a phone call.

Who uses it: Every employee asks. Managers and HR approve.

Step by step:

1. Open Location requests and press + New request.
2. Choose the dates and write the place and the purpose. Send it.
3. After approval you can mark attendance from outside the branch on those dates. The check of the place itself needs the mobile app.

35. KPI library

The one master library of all KPIs of Mirror-HR. Every client's KPI pack is made from it.

KPI library: overview

Where: KPI library

What it is: The one master library of all KPIs of Mirror-HR. Every client's KPI pack is made from it.

Why it is there: So that a KPI is written once and used for every client.

Who uses it: Only the Mirror-HR platform team.

Step by step:

1. Open KPI library from the platform menu.
2. Search a KPI, or add one with its category, maximum score, method and rule.
3. A KPI that belongs to a module is shown to a client only when that module is on for the client.

36. KPI packs

The set of KPIs chosen for one client, copied from the KPI library. There is no starter pack; each pack is built by the Mirror-HR team for the client.

KPI packs: overview

Where: KPI packs

What it is: The set of KPIs chosen for one client, copied from the KPI library. There is no starter pack; each pack is built by the Mirror-HR team for the client.

Why it is there: So that each client gets only the KPIs that fit the business.

Who uses it: Only the Mirror-HR platform team.

Step by step:

1. Open KPI packs and choose the client.
2. Choose the KPIs to add: one by one, or all of a category. You can copy the pack of another client and then change it.
3. Remove a KPI that does not fit. The client sees the pack in PMS > KPI master.

37. Clients (live)

The companies that use Mirror-HR, with the status, the employee limit and the modules each one has.

Clients (live): overview

Where: Clients (live)

What it is: The companies that use Mirror-HR, with the status, the employee limit and the modules each one has.

Why it is there: So that Mirror-HR can start, pause and set up a client without touching the database.

Who uses it: Only the Mirror-HR platform team.

Step by step:

1. Open Clients (live) and press to create a client: the company code (small letters, digits or -), the name, the employee limit and the modules.
2. Write the first admin: the name, the employee code, the mobile and a password of at least 8 characters. The admin must change it at the first login.
3. To change a client later, set the status (active, test or suspended), the limit and the modules. A suspended client cannot sign in.
4. Take the logo file (PNG or JPG) from the client and press Logo on the client row: choose the file and Save. Every user of that client then sees the logo in the top bar, on the login page when the company code is typed, on the payslip and on the training certificate. Our own name stays where it is. Remove logo takes it off.

38. Enquiries

Companies that want to use Mirror-HR fill one public link. The team checks the details, talks to them and then makes the quotation. The client never sees a price.

The enquiry link and form

Where: Enquiries > Enquiry link for clients

What it is: One link for everybody. The client fills the legal name, trade name, type of company, GSTIN, PAN, CIN, registered address, the authorised person, the billing and support contacts, the number of employees and branches, the preferred start date, the modules needed and a note. After Submit the client gets a reference such as ENQ-0001.

Why it is there: So that the details needed for the quotation and the agreement come from the client in one go, and the quotation is not seen before the talk.

Who uses it: The Mirror-HR platform team: the platform admin and the Sales logins.

Step by step:

1. Open Enquiries. The link is at the top. Press Copy link and send it to the client by WhatsApp or email.
2. The client opens it, fills the form and presses Submit. No login is needed.
3. The enquiry comes to the Enquiries list with the status New.

Good to know:

- The GSTIN, PAN, mobile and email are checked. One GSTIN or mobile number can send one enquiry in 90 days; a repeat is stopped with a message. A hidden field stops robots.

The Enquiries list

Where: Enquiries

What it is: All enquiries with the reference, company, contact, employees, date and status. Filters: All, New, In discussion, On hold and Lost.

Why it is there: So that no enquiry is forgotten and the team sees what is new.

Who uses it: The Mirror-HR platform team: the platform admin and the Sales logins.

Step by step:

1. Open Enquiries. Use the filters at the top to see one status.
2. Press Open on a row to see all the details, the notes and the status buttons.
3. Write what happened in Add a note and press Save note. Every note keeps the date and the name.
4. Press Mark in discussion when you have called the client. Use On hold or Lost when the client is not going ahead. Each change is written in the notes.

Good to know:

- A client who came by phone or in a meeting: press + Add client enquiry, fill the company, GSTIN, PAN, address, contact, employees and modules (the Select all box ticks every module), and press Save enquiry. It goes into this same list as New and gets the same checks (GSTIN, PAN, mobile, email, one enquiry per GSTIN or mobile in 90 days). After that the quotation, agreement, Make live and the first admin login follow as for every enquiry.
- Making the quotation from an enquiry, accepting it, the agreement and Make live come in the next parts.

Sales logins

Where: Enquiries > Sales logins

What it is: A separate login for the sales people. A Sales login sees only Enquiries (and later Quotations). It cannot see licensing, billing, clients or KPI packs.

Why it is there: So that the sales team can work on enquiries without seeing the rest of the platform.

Who uses it: Only the platform admin makes and switches the Sales logins.

Step by step:

1. Open Enquiries and press + Sales login at the bottom.
2. Write the name, the email and a first password of at least 8 characters. Save.
3. Tell the password only to that person. They sign in with the email and leave the company code empty.
4. To stop a person, press Inactivate on the row. Press Activate to give it back.

Quotations: make, revise, send, accept

Where: Enquiries > Quotations

What it is: A quotation is made from an enquiry. It has a plan and modules, the billing cycle, the contract months, the base fee with the employees included, the extra rate, the hard cap, an optional one-time setup charge and the date it is valid till. The GST is worked out by the system: CGST and SGST for a client in our own state, IGST for any other state. The PDF is made in the browser.

Why it is there: So that every price is on record, a change is a new revision and not an overwrite, and the client never sees the price inside the app.

Who uses it: The Mirror-HR platform team: the platform admin and the Sales logins.

Step by step:

1. Open an enquiry in Enquiries and press Generate quotation. The client details and the modules the client asked for are filled in. Write the base fee, the employees included, the extra rate, and the setup charge if any. The first invoice total is shown below as you type.
2. Press Save. The quotation is a Draft: you can still Edit it. Press Preview PDF, and in the page that opens choose Save as PDF in the print window.
3. Send the PDF to the client yourself (WhatsApp or email) and then press Mark as sent. The enquiry becomes “Quotation sent” and the quotation cannot be edited any more.
4. If the client asks for a change, press Revise. A new revision (R2, R3…) is made, the old one is marked Replaced and is kept.
5. When the client says OK, press Accept quotation and confirm. The quotation is locked, and the enquiry becomes Accepted. If the client says no, press Client rejected; the enquiry goes On hold and you can revise later.

Good to know:

- Only one quotation at a time is live for an enquiry. An accepted quotation can never be changed.
- After Accept, the agreement, the onboarding form and the checklist are in Enquiries > Onboarding.
- The agreement, the onboarding form and the checklist after Accept come in the next part.

Our details

Where: Enquiries > Our details

What it is: The details of our own company that are printed on every quotation: the legal name, address, state, GSTIN, PAN, SAC, GST rate, days to pay, days a quotation is valid, support time, the data term, the optional bank details, and the name and designation of the person who signs.

Why it is there: So that these are written once and not typed in every quotation. The state decides CGST and SGST or IGST.

Who uses it: Only the platform admin changes them. Sales logins do not see this tab.

Step by step:

1. Open Enquiries > Our details. Write the legal name first: a quotation PDF cannot be made until it is written.
2. Check the other details. The bank details are optional: if they are empty, the PDF has no bank line.
3. Tick "The agreement text has been reviewed by our advocate" only after the advocate has read the agreement text. Until then the agreement PDF carries a DRAFT mark.
4. Press Save. Quotations already made keep the details they were made with; new ones use the new details.

Onboarding: steps of an accepted client

Where: Enquiries > Onboarding

What it is: Every enquiry whose quotation is accepted comes to this tab with its stage and progress. Opening one shows the steps in order: quotation accepted; agreement, onboarding form and checklist sent; signed agreement received; filled onboarding form received; advance payment (optional); client created (Make live); then the setup checklist and Make Active. Each tick keeps the date and the name.

Why it is there: So that nothing is forgotten between the OK of the client and the first day of work, and so that anybody can see where each client stands.

Who uses it: The Mirror-HR platform team. The platform admin ticks the signed agreement and the advance, makes the client live and makes it Active. Sales logins tick the other steps.

Step by step:

1. Open Enquiries > Onboarding and press Open on a client.
2. Press the PDF button of the Agreement, the Onboarding form and the Checklist, send each to the client yourself, and tick it.
3. When the signed agreement comes back, the platform admin ticks Signed agreement received. The enquiry becomes Signed. When the filled form comes back, tick Filled onboarding form received.
4. Make live (see the next entry). Then tick the setup checklist as you finish each step. A tick can be taken back by pressing it again.

Good to know:

- Progress counts 16 steps. The advance payment is optional and is not counted: Make live does not need it.

The agreement, the onboarding form and the checklist

Where: Enquiries > Onboarding > PDF

What it is: Three documents that are made from the accepted quotation, the enquiry and Our details, with the client name, address, GSTIN, plan and fees filled in. The Agreement is a SaaS subscription agreement with clauses on the services, the term, fees and payment, data protection, ownership, return and export of data (only after dues are cleared), liability, termination, and disputes (arbitration at Narayanpur), with Annexure A of commercial terms and Annexure B of data protection. The Onboarding form is filled by the client: company, people, branches, organisation, attendance, leave, payroll and statutory details. The Checklist lists what the client must give and the setup steps of the Mirror-HR team.

Why it is there: So that every client gets the same papers, filled with the correct details, without typing them again.

Who uses it: The Mirror-HR platform team. The platform admin ticks the signed agreement and the advance, makes the client live and makes it Active. Sales logins tick the other steps.

Step by step:

1. Open the client in Enquiries > Onboarding and press PDF against the document.
2. In the page that opens, choose Save as PDF in the print window, and send the file to the client.
3. Write the legal name of the company in Our details first, or the documents are not made.

Good to know:

- The Agreement text is a draft prepared for review. Until the platform admin ticks, in Our details, that the advocate has reviewed the text, the Agreement PDF carries a DRAFT mark and a line that it must not be signed.

Make live and Make Active

Where: Enquiries > Onboarding > Make live

What it is: Make live creates the client company from the accepted quotation: its modules, and an employee limit equal to the hard cap of the quotation. It also makes the first admin. The client starts in Test. After the setup checklist is done, Make Active switches it to Active.

Why it is there: So that the client company is made once, from what was agreed, and cannot be made twice or before the agreement is signed.

Who uses it: Only the platform admin.

Step by step:

1. Tick Signed agreement received. The Make live button becomes active.
2. Press Make live. Check the company code (for login; small letters and digits), and write the first admin: name, employee code (E001), mobile and a first password of at least 8 characters. Press Create client.
3. Tell the password only to the admin. Then do the setup: give the modules, build the KPI pack in KPI packs, import the organisation and the employees, set the rights, the shifts and the policies, train the admin. Tick each step.
4. When the client is ready, press Make Active and confirm.

39. Policy Management

HR and Admin upload the company policies here. HR Assistant (the chat button at the bottom right of every page) answers employees only from these policies, never from general knowledge or the law.

Policies For HR and Admin

Where: Administration > Policy Management > Policies

What it is: The list of company policies with their live version, who may see them and their status: Processing, Ready to test, Active, Failed or Archived.

Why it is there: HR Assistant can answer only what is written in an Active policy. Keeping this list correct keeps the answers correct.

Who uses it: HR and Admin.

Step by step:

1. Open Administration > Policy Management and press "+ Upload policy".
2. Write the policy name, choose the category (Leave, Attendance, Salary, Conduct, Travel ...), the version and the effective date.
3. Tick the roles that may get answers from it. A policy only for managers: tick Manager, HR and Admin. Choose "Only selected departments" if it is for some departments only.
4. Choose the file: PDF, DOCX or TXT, up to 20 MB. Scanned PDFs are read with OCR.
5. Leave "Switch it on ... as soon as it is processed" ticked to make it live at once, or untick it to test first in Test Chat.
6. Press Upload. The status shows Processing and changes by itself (usually within a minute; a long scanned file takes longer). You can keep working.
7. Press View to see the text that was read from the file: check headings, numbers and Hindi text.
8. When the policy changes, press "New version" and upload the new file. When it is processed, the old version stops being used automatically.
9. "Edit" changes the name, category, roles and departments without a new upload. "Archive" stops a policy at once (Restore brings it back). "Delete" removes it and its files for good.

Good to know:

- Failed: the reason is shown under the status (for example a password-protected PDF). Fix the file and press "Try again" or upload a New version.
- Each company sees and searches only its own policies.
- A .doc file (old Word): open it in Word and save it as .docx first.

Test Chat For HR and Admin

Where: Administration > Policy Management > Test Chat

What it is: A chat for HR to ask questions as an employee, a manager, HR or Admin of a chosen department, before a policy is published. It also searches versions that are processed but not yet published, and shows the match score.

Why it is there: To be sure the answers are right and that a manager-only policy is not shown to employees, before everybody uses it.

Who uses it: HR and Admin.

Step by step:

1. Choose "Ask as" (for example Employee) and the department.
2. Ask a question the policy answers, for example "CL kitni milti hai?". The answer must match the policy and show the source.
3. Ask a question the policy does not answer. The reply must be "Is vishay par company policy me jaankari uplabdh nahi hai...".
4. If all is right, go back to Policies and press Publish on the version that is Ready to test.

Good to know:

- Test chats are not counted in Unanswered Questions or Chat Logs.
- When there is no answer, a red "Why" line under the reply tells the reason (for example the best match is below the needed score, or the answer had a number that is not in the policy). In Chat Logs, open a question to see "Why no answer".
- When the app is in Hindi (हि), the HR Assistant answers in Hindi.
- If the Hindi text of an uploaded file looks broken (an old Hindi font), the policy list shows a ⚠ note. PDF pages like that are read again by OCR; for the best result upload the policy from Word (DOCX) or with a Unicode font (Mangal, Nirmala UI).

Unanswered Questions For HR and Admin

Where: Administration > Policy Management > Unanswered Questions

What it is: The questions employees asked that the policies did not answer: a count per date, and each question with how many times it was asked.

Why it is there: It shows what is missing in the policies, so HR can add it.

Who uses it: HR and Admin.

Step by step:

1. Choose the dates.
2. Read the questions asked most often.
3. Add the missing point to the policy and upload it as a New version.
4. Press "Mark resolved". "CSV" downloads the list.

Chat Logs For HR and Admin

Where: Administration > Policy Management > Chat Logs

What it is: Every question asked to HR Assistant: employee, question, answer, source, date and time, and the 👍/👎 feedback with its comment.

Why it is there: For audit, and to see where the answers can be improved.

Who uses it: HR and Admin.

Step by step:

1. Choose the dates; search by employee or question; filter by answer type or feedback.
2. Click a row to see the full answer and the part of the policy it came from.
3. "CSV" downloads the filtered list.
